

## **Mr. Chem-Dry Extends Tile Cleaning Services To Farmington, Utah**

*January 13, 2020*

January 13, 2020 - PRESSADVANTAGE -

Centerville, Utah based Mr. Chem-Dry has announced they are extending their tile cleaning services in Farmington, Utah as part of their ongoing expansion across the state. The firm is most known for their premium carpet and rug cleaning services as well as pet urine removal treatments. Their tile cleaning services provide the same high quality sanitation for ceramic tiles, slate walkways as well as granite and marble floors. Learn more here: [Tile Cleaning Farmington Utah](#).

Speaking on behalf of the company, Mr. Chem-Dry President Daryl Olsen says, "Most people, when they see the build up of grime and dulled surfaces, choose the most potent cleaning solutions they can find. However, these harsh chemicals can damage the protective glazing of floors and shorten their lifespan. It is a shame that many beautiful Utah homes feature tile and stone, both in and out doors, that look dingy. We recommend that you call the professionals in to get the safe deep cleaning you need to help restore your surfaces so they look and feel like new."

The firm was recently featured on Street Insider in an article that highlighted their tile cleaning services. The article states that a homeowner's reluctance to clean extremely dirty tiles is understandable as it can be

really frustrating to try and get rid of all the stubborn dirt that has stuck to the tiles and grout. Fortunately, Mr. Chem-Dry has a cleaning solution that can get rid of even the most stubborn types of dirt.

In the article, Olsen is quoted, "We experimented a lot recently and came up with the perfect mix of dish soap, baking soda and hydrogen peroxide that works wonders for cleaning grout from tiles. And then the steam cleaners that are used to clean the carpets can also be used to clean tiles as well. And finally, there is the combination of vinegar and baking soda, which has been found to be effective in cleaning mildly dirty to heavily dirty floor tiles."

The company also uses a sanitizer to help ensure that all surfaces are sparkly clean and safe. Their cleaning formula has been thoroughly tested by an independent laboratory that assessed its efficacy and safety by carrying out tests in several homes with a variety of tile, stone and grout surfaces. It was determined that they were able to get rid of an average of 98.6% of bacteria found on these surfaces.

Unlike other cleaning services, Mr. Chem-Dry will apply a durable sealant to the grout that acts as a barrier. This helps the grout stay clean and simplifies any ongoing cleaning procedures. Their attention to detail, in addition to ensuring that the work is performed with the highest standards of efficiency, is what sets them apart from their peers.

The company's technicians have gained a wealth of experience working in the Salt Lake, Davis and Weber counties for over 20 years. They can service apartments, homes and commercial properties. Through their website, those interested in booking their cleaning services for carpets, tiles and upholstery can specify their precise needs, including protectant, sanitizer, specialty spot removal and pet urine and odor removal treatment. Customers will receive an online estimate for the costs, with the ability to apply a coupon or discount. They will also be able to schedule their appointment as well as review and confirm their request.

Olsen concludes, "Today, few people stick to a regular cleaning schedule. Many now prefer to use our services rather than risk ruining their floors with other products, and they don't want to settle for the best others can do. We know that, even in small homes, moving furniture around to ensure every floor surface is sparkling clean takes up time—which most people don't have in their busy lives. They let us take care of the deep cleans, helping their homes and upholstery look their best so they can focus on making the most of their time together."

Mr. Chem Dry will go out of their way to help each of their customers get the best clean they can provide (while maintaining eco friendly practices). Before they begin applying any cleaning agents, they will conduct a thorough examination and run pretests to determine the best solution to use in a given situation. For those who need an emergency clean, the company will go the extra mile to get them an appointment at short notice.

Those who want to book their services are encouraged to call directly or request their desired services online. Customers who are active on social media may follow Mr. Chem Dry to take advantage of the company's special offers and discounts as well as stay abreast of their latest news and important announcements.
