

Mineral Springs Dumpster Rental Business Spreads Christmas Joy by Giving Away Useable Salvaged Items to Those in Need

January 30, 2020

January 30, 2020 - PRESSADVANTAGE -

This Christmas a Mineral Springs outfit that is part of the Nationwide Dumpster Local team, have found a unique way of turning junk removal into joy. They have been salvaging useable items from their dumpsters before they are taken to the landfill for disposal. The company then distributes them to locals in need. Those who are associated with the company said it has always been in the owner and his son's nature to look for creative ways to give back to their community.

Here is what company owner Mike Maffucci had to say about this new holiday venture, "As a company that deals in junk removal, we often see people throw out items that are in perfectly good shape such as furniture and appliances. My son and I thought this was a real waste to just dispose of these items. So we came up with the idea of having our drivers look through the dumpsters around the holidays before they take them to the landfill. Even we were surprised by how many useable items we could salvage and, in turn, give them to those in need. It made everyone at the company feel good and we intend to now make it a tradition not just at Christmas but all year round. This really is a true story of many cases where one man's junk is another man's treasure. If we can help a local family in need that really makes my day."

The owner of dumpster local rentals junk removal stated that most of the items they salvage are household goods such as couches, bed frames, mattresses, and old kitchen tables. He says they do run across toys that just need a little cleaning on occasion too. They were even able to provide one needy family with an entire houseful of furniture and other useful household items. He describes what they are doing as a "win-win" situation for everyone. Local needy families get items that they can use, less waste goes into landfills, and Maffucci and Son has made their community a nicer place to live all at the same time.

Besides giving back to their community in very generous ways, the company also offers a wide variety of

dumpster and junk removal services. Maffucci says that many people call them to clean out attics, yards, basements, and garages so they can be used for something besides storage. Typical items that people get rid of from these areas include carpeting, recyclables, Mattresses, refrigerators, playground sets, assorted furniture items, and even hot tubs. He says as long as someone's junk does not contain hazardous material, they will find a way to responsibly dispose of it.

The dumpster rental company owner also stated that they are debris disposal specialists. Many contractors use them for such things as hauling away broken concrete or for use during their construction cleans. Maffucci says that they often get requests to pick up old tires and scrap metal too.

Maffucci and Son have been helping local North and South Carolina homeowners clean out junk and remove clutter from their homes since 2007. They serve Charlotte, many different Charlotte satellite communities, and they also serve all of Union County, North Carolina and Lancaster and York Counties in South Carolina. He says that they have many different size dumpsters that can handle a variety of different business, construction, and household junk disposal needs. These dumpsters can be as small as 10-yards in capacity and some even hold over 40-yards of material. Maffucci says that they are always ready to talk to people on the phone who are interested in their dumpster rental services. He also added that they take much pride in delivering dumpsters in most instances on the same day that people call and request them.

The company has also been recognized in several ways for their commitment to their customers. This includes a Home Advisor top rating, several Home Advisor Elite Service Awards, and in 2017 they were selected as the Best of Home Advisor rated businesses.
