Carberry said, "This is a golden opportunity for anyone wanting to make a career out of hypnotherapy. Many courses take months to complete but most people just can't spare that sort of time, which is why I developed this unique fast track program. I will be passing on my years of experience and at the end of the course everyone will have the tools they need to succeed. My course can help people to make money from hypnotherapy and it's incredibly popular. Places are limited, so anyone wanting to attend should book at the earliest opportunity."

The course is intended to help those interested in making a career from hypnotherapy and those who wish to make a sideline from it, as well as those who are simply interested to see what it can do or do for them. Its aim is to give students access to Carberry's wealth of knowledge and to become certified hypnotists.

Attendees will be provided with all the materials needed to take part in the course and once it has been successfully completed, they will receive a certificate attesting to their knowledge and understanding using hypnotherapy as a treatment.

Carberry's unique fast track three-day course will enable attendees not only to gain more control over their own mindfulness, but to be able to hypnotise family, friends, and others. It will give them the opportunity to set their own hours and to make good money for their services. In other words, to make a successful career, full-time or part-time, from hypnotherapy.

Hypnotherapy can be used to address issues such as smoking and weight control which are problem areas for many and can help them to take back control and successfully quit and lose weight. It is not only smoking and weight control that hypnotherapy can help with though. It can also be used to help those with problems such as alcohol, drug, or gaming addiction, insomnia, pain management, anxiety, self-esteem, even building a successful business, and much more.
