

Banner Construction Extols Benefits Of James Hardie Siding

January 14, 2020

January 14, 2020 -

St. Louis, MO based Banner Construction is pleased to announce that they are able to supply homeowners and developers in the area with James Hardie siding, the leading global solution in fiber cement siding. Banner Construction is partnered with James Harding as an Elite Preferred James Hardie Siding Contractor, making them the most viable source of premium siding in St. Louis. You can learn all about Hardie Siding on the company?s website, which hosts a comprehensive introduction on the material and its various benefits.

As the company notes on their website, ?James Hardie represents 90% of the fiber cement siding market in the United States, and it has been installed on over 5.5 million homes. Its popularity is due in large part to its remarkable durability and beauty. James Hardie is so confident in the quality of their products that they offer a 30-year limited warranty. Not many siding companies provide such extensive coverage for their products.? Banner Construction expresses a similar confidence in the value represented by this cladding material, and this is why they are quick to encourage homeowners to incorporate James Hardie siding into their homes.

?There are numerous benefits to James Hardie Siding,? says Banner Construction. "If you plan on staying in your home, the cost is well worth it. Banner Construction is an Elite Preferred James Hardie Siding Contractor, and we have a resource page on our website that can answer most questions people have about Hardie Siding. We urge you to visit so you know exactly how much you stand to gain.?

This resource page, for instance, explains that fiber cement siding is a building material made of a mixture of cement, sand, and cellulose. This combination gives it the same visual appeal of wood but also allows it to boast a number of advantages over its natural counterpart. It is more durable, easy to paint, lasts longer, and is resistant to rot and mildew. It is also not porous, which means it will not malform and crack due to changes in heat and humidity. Overall, the material requires very little maintenance.

While it offers an admirable degree of protection against rain, wind, hail, and similar phenomena, homeowners will likely appreciate that fiber cement siding is noncombustible. In effect, this siding material will not easily contribute to a home?s destruction in the event of a fire; fewer combustibles can mean the difference between a small fire that can be put out relatively easily and a blaze that requires much more effort to control. Learn more here: James Hardie Siding St Louis.

Notably, James Hardie siding comes in a wide and varied range of styles and colors, giving homeowners the absolute freedom to choose a material and finish that complements their home perfectly. Both James Hardie and Banner Construction are aware of the fact that even subtle adjustments can transform an otherwise nondescript building into a timeless classic that will be inhabited by generations?or suit the owner?s unique vision. Due to this, partners like Banner Construction take several measures to help homeowners find the siding that suits them best.

The company?s attention to detail and customer-oriented service is often the subject of high praise in the reviews they receive online. Similarly, the homeowners they work with tend to prefer the company?s finesse and capability in construction, especially if they have previously used the company?s services. David Knight says in his 5-Star Google review, ?After reviewing Banner, we decided to go with them for all of our external updates?new roof, gutters, siding with soffits and fascia. They were extremely easy to work with and their crews did great work! We also gave them a tight and challenging window to do the work, and they made it happen. We even got personal attention from the President of the company to resolve a minor problem.?

More information is available on the company?s official website, including an in-depth guide on James Hardie?s products and the situations they are best suited for. Customers are also welcome to contact Banner Construction to bring up any further inquiries with their customer service team. Additionally, social media users may connect with the company through their preferred platforms to stay up to date with their latest

news, offers, and announcements.
