# Hotel Noise Consultants Provide Noise Control Services In Alachua

*January 21, 2020*

January 21, 2020 -

Alachua, Florida based RML Acoustics, LLC, a noise consultancy service, is pleased to announce the availability of their hotel noise consultation services. They offer noise management services for a wide variety of applications. The company has helped and continues to help all kinds of clients with their noise related issues. One of their areas of expertise involves noise management for hotels. RML Acoustics has years of experience in helping hotels control noise levels and produce pleasant acoustic environments for their guests.

Acoustical design helps with many different types of noise related problems, and RML Acoustics has worked on over 800 noise control projects all over the United States. They have helped hundreds of clients deal with sound related issues. The goal of RML?s services is to help a client establish what their sound design goals are and how best to meet these goals. Their services cover everything from the early architectural design stages to simple improvements of already existing spaces. The company?s experience with all kinds of acoustical design projects makes them one of the top choices for those looking for reliable hotel noise consultants.

RML acoustics is run by Rob Lilkendey, an acoustical consultant with over 23 years of experience in the field of architectural and environmental acoustics. He has solved all kinds of noise and vibration related problems in buildings, helping the owner optimize acoustic environments. He has worked on themed entertainment space, world class performing arts venues, hospitals, schools and hotels. Rob brings a great deal of knowledge and experience to every project, producing great results almost everywhere he goes.

The co-owner of the company is Lana Lilkendey, the business manager. Lana brings over 17 years of experience to RML Acoustics, having held multiple positions in the industry over the years. She has worked with marketing staff from many different architectural firms to directly develop and produce marketing material for a wide variety of different projects. She is in charge of the marketing side of RML and holds multiple distinctions, including a number of bachelor?s and master?s degrees. She is always ready to give her customers exactly the kind of help they need to deal with their acoustical problems.

Together, Lana and Rob have managed to establish themselves as highly respected environmental noise consultants. As the acoustical design company says, ?RML Acoustics offers comprehensive noise assessment, noise mitigation, sound monitoring and expert witness testimony services on a wide variety of environmental noise related projects. We use a proven process to help you achieve your project?s acoustical objectives.?

One can find RML in multiple areas, including Jacksonville, Tampa, Orlando, Fort Lauderdale, Naples, Atlanta, Charleston and the entire gulf region. The company says, ?Although the majority of our work takes place in the southeast United States, we have easy access to three major airports and are pleased to service all areas of the country.?

The services of a professional acoustical consultant can create a great deal of change in a particular space. Noise management is an absolute necessity for almost any space that people intend to live or work in. RML provides solutions for all kinds of acoustical issues, and their high quality services have been praised by many clients. One 5-Star review of the company says, ?We're a developer/G.C. of high-end, multi-family communities who has hired Rob on multiple occasions to specify details for new construction projects, address issues in existing communities and do the appropriate acoustical testing as necessary. Rob is extremely knowledgeable and helped educate our team on how we can practically address the various factors that contribute to noise transmission between homes. Our homeowners are thrilled they don't hear their neighbors!?

Read more about the acoustical design service online at the company?s website and other online resources. Their architectural acoustic design is known to be a cut above other similar services in the area, and the company looks forward to helping Florida build better acoustical spaces.
