

CEREC Dentist and Solea Laser Technology Available at Lakefront Family Dentistry

February 07, 2020

February 07, 2020 -

Lake Elsinore, CA, based Lakefront Family Dentistry is delighted to announce that patients benefit from the industry leading CEREC system used for cosmetic dentistry. These custom, same-day crowns and veneers created through their own in-house milling machines boast a variety of advantages over the old, conventional option, which took weeks to make at another facility.

Dr. Derek B. Hauser, DDS, is a general and cosmetic CEREC dentist in the Inland Empire of Riverside County with over 27 years of experience, in addition to owning a high-end, private practice that invests in the latest dental technology for its patients. The convenience offered at this practice saves patients time and money, including utilizing the newest Solea Laser technology for fillings and gum treatment. Numbing is a thing of the past with this new laser.

Restorative dentistry includes using CEREC solutions to replace lost teeth with dental implants and custom abutments using the highest quality CEREC Zirconia meso block for natural looking porcelain crowns and veneers while patients wait. Patients of Lakefront Family Dentistry no longer need to take several days off work to receive a beautiful smile transformation.

CEREC, or Chairside Economical Restoration of Esthetic Ceramics, is a system owned by only a small percentage of the US? 200,000 dentists, according to Lakefront Family Dentistry. Lakefront Family Dentistry states, ?Many patients come to Dr. Hauser for their CEREC porcelain veneers and crowns while enjoying the convenience of less invasive procedures as well as many same-day services, which is not traditionally offered by most dentists. We look forward to having an opportunity to serve the needs of your family.?

CEREC is a software tool that can be used by qualified dental practitioners to map out high quality ceramic restorative dental crowns using 3-Dimensional Computer-Assisted Design (CAD) software, along with a Computer-Assisted Milling (CAM) device. This allows custom-fitted dental crowns to be created in mere

minutes, and porcelain veneers would have required the patient to come back for multiple visits before Dr. Hauser invested in two CEREC milling machines, which includes the up-to-date software and computer system. The uncomfortable, sticky trays are a thing of the past with digital imprints now taken in a few minutes.

The newest Solea Laser dental treatment at their office does away with the need for numbing agents altogether, allowing patients to be more at ease during their procedures. It is a safe, pain-free form of dentistry that enables multiple treatments to be carried out in the span of a single session. In addition to allaying any fears regarding visits to the dentist, this also reduces the number of appointments needed to complete a procedure.

They add, "At Lakefront Family Dentistry, our goal is to provide the highest quality and most efficient care to each of our patients. We are a family-oriented practice, focused on maintaining dental health for everyone. When you visit our office, you will be met with a friendly, experienced team of professionals who are dedicated to serving the needs of you and your family. Dr. Hauser performs a thorough examination on all of his patients and works together with them to determine the best course of treatment for their individual needs."

Current and new patients who have dental anxiety now enjoy coming to the dentist with Lakefront Family Dentistry's beautiful therapy dog named Stella. Whether one is a child or adult, patients have had the pleasure and relaxation of being treated with Stella right by their side during treatment. The calming presence of this therapy dog has made an enormous difference to many patients, based on their own written reviews.

This private practice only accepts PPO Provider dental care plans. They do not accept HMO; managed care plans or Medi Cal. Additional insurance information can be found on their official website. New patients can call during business hours or fill out the appointment form on their website anytime.
