

Furnace Repair Oshawa Partners With Martino HVAC To Expand Services

January 27, 2020

January 27, 2020 - PRESSADVANTAGE -

Oshawa Ontario based Furnace Repair Oshawa is delighted to announce that they have recently formed a partnership with Martino HVAC to help expand their available services. They can now offer full heating and air conditioning services in the Oshawa area.

Mario Lemeaux, speaking on behalf of Furnace Repair Oshawa, says, "We are excited to be partnering with Martino HVAC, especially through this winter. It means we can provide an even bigger range of services to customers, new and existing alike. Our customers know that they can count on us to get to them fast and get the job done right the first time. We offer a 100% satisfaction guarantee on our work. We can handle any emergency 24/7. Just give us a call."

During the winter months, the furnace is considered to be the most important appliance in any home or business. However, they also need regular maintenance and inspections to ensure that any problems are detected before they impact the unit's lifespan (which is typically around 20 years or more). Homeowners who do not have the training and experience to diagnose such issues or commit repair complex repairs need to rely upon someone they can trust.

However, many families forget to carry out or skip maintenance until it becomes a problem. Unfortunately, this approach can lead to an emergency situation that requires a quick diagnosis and repair or replacement, especially when the worst possible weather hits. That is when they need to call in someone they can trust to repair and tune up all furnace makes and models. Over the years, companies like Furnace Repair Oshawa have helped many homeowners deal with problems for virtually every furnace on the market, giving them the benefit of qualified engineers and unparalleled customer support.

In addition to partnering with Martino HVAC, the company has also launched a new website, which can be accessed at <https://furnacerepairoshawa.ca/>. Designed to work well on any mobile device (in addition to laptops and desktop computers), it can help visitors find the information they need regarding the company's services as well as provide answers to some of the most frequently asked questions most customers have

about their furnaces. It also features the ability for customers to schedule an appointment at their own convenience or call Furnace Repair Oshawa directly from any phone enabled device.

Lemeaux continues, "We are excited to launch our new website now, at the beginning of the year. We have started sharing our articles through the website and look forward to hearing feedback from our customers. We have relied on word of mouth to help everyone in our community get the professional service and high quality customer service they deserve. We also hope you like the ability to easily schedule maintenance or an appointment for a tune up."

The company has already received a new 5-Star Review on Google following the Martino HVAC partnership. Charles Lewis says in their review that the company did a "Splendid job. Tech identified the problem with my heating system and was able to address the issue quickly and make the repairs. Followed up with me the next day to make sure everything was working properly. An overall great experience."

Lemeaux states, "We have been serving our community for years, and we are always grateful for the recognition we receive. Seeing such positive feedback online is a whole new experience for us and makes us want to work even harder to help everyone get that same peace of mind knowing that we can deal with any maintenance or malfunction they have. We can also provide an energy audit of your home to identify where energy is being wasted, followed by a detailed plan on how to fix it."

Furnace Repair Oshawa further shares information regarding certain warning signs that homeowners may watch out for in the event their furnace needs professional attention. They recommend monitoring electrical bills, checking whether the thermostat is reliable and noting if the furnace makes any unfamiliar noises. Should these signs appear, the company's help is a phone call away. They also recommend having regular inspections and maintenance carried out in order to keep the furnace in question running efficiently, thereby helping to extend its lifespan.

Those who want to avail themselves of the firm's energy audit, inspection and maintenance services can call them directly from the website or schedule an appointment online. More information can be found on their website, and interested parties may contact Mario Lemeaux to follow up on any inquiries as well.
