Milton Salvage Yard Informs the Community About the Benefits of Closed-Loop Recycling

January 22, 2020

January 22, 2020 -

Milton, Fla. ? Closed-loop recycling is a practice that could have a dramatic impact on recycling efforts within the automotive industry in the new year. As the automotive industry continues to grow and thrive, auto recyclers and manufacturers are turning their attention to improving the closed-loop recycling efforts in the United States. Butler?s Auto Recycling, a Milton salvage yard, feels it is important to keep their community informed of rising trends affecting the auto recycling industry and is explaining a few of the benefits of this practice.

The process of closed-loop recycling impacts the manufacturing side of the automotive industry. The materials used in the manufacturing process are recycled back to their original state without losing any key properties. This is a more efficient form of recycling because it allows the materials to be used indefinitely and reduces the amount of natural resources used in producing vehicle materials. Vehicle manufacturers have found ways to recycle copper, aluminum and even batteries. The lead, plastics and electrolytes within the batteries can all be recycled through a closed-loop practice, reducing the environmental impact.

With the importance of reusing or recycling materials becoming a focus of manufacturers, auto recyclers are

also looking to see an increase in recovering recalled products. One example is the defective Takata airbags that have recently had a massive recall, resulting in hundreds of thousands of airbags being removed from end of life vehicles. Butler?s Auto recycling has joined with other members of the auto recycling community to help remove these faulty airbags from circulation. The Milton auto recycler has the resources and technology to remove these airbags and other recalled products to prevent them from being reused.

Butler's Auto Recycling is proud to offer quality used auto parts to customers in the Pensacola, FL and Mobile, AL areas. For more information about Butler's Auto, give their office a call at (850) 623-4500 or visit their website today at http://www.miltonautoparts.com/.
