Chicago Website Design SEO Company Highlights New Bluehost Features

January 31, 2020

Chicago, Illinois - January 31, 2020 - PRESSADVANTAGE -

Web design and SEO service provider, Chicago Website Design SEO Company, has recently released a 2020 Bluehost review. The Bluehost 2020 review highlights all the features provided by the web hosting company and how they can benefit web masters.

According to Jack Lombardi, SEO expert and founder, "Bluehost has everything you need in customer support. From an informational knowledge base, email ticket support, phone support to the active live chat, you can get help around the clock. The live chat is responsive and you will get connected in less than 2 minutes though there might be slight delays between replies. However, you will find the support team to be very friendly and your questions will be satisfactorily answered."

"Prepaying for web hosting is normal, and Bluehost is not an exception. What makes them different is the fact that they will give you your money back if you are not satisfied in 30 days. You can use this to try out their web hosting services. Well, you will only get your web hosting money back and not on other services such as add-ons and domains. You will need to send in the refund request before 30 days.

?Always make sure you read the terms and conditions before signing up for a hosting service,? said Jack.

?Apart from the impressive security features, Bluehost gives its clients different integrations and apps that make the use of different web services smooth. For instance, you can take advantage of their domain manager that allows multiple domain management with daily, weekly or monthly backups.

?It is possible to install content management systems like WordPress, Joomla, e-commerce shops, Drupal and many others with simple steps. Bluehost also provides Content Delivery Network access for people who want to have large files and images. The network reduces the load on your servers and delivers the data to users while maintaining the high site speeds,? added Jack
