

Family Dentistry in Rocklin Now Offers Opalescence Tooth Whitening

February 11, 2020

February 11, 2020 - PRESSADVANTAGE -

Family Dentistry in Rocklin, California, has announced that they are now offering the 10-day Opalescence Go? prefilled teeth whitening system. The Opalescence whitening gel is provided in innovative UltraFit? trays. Each tray is designed to fit any smile and is ready to use right out of the box. The unique tray materials ensure a comfortable fit and its molar-to-molar coverage makes sure that the whitening gel comes in contact with more teeth. The whitening gel contains fluoride and potassium nitrate and it comes in two flavors: mint and melon. It is available in 10 percent hydrogen peroxide, which is to be worn 30 to 60 minutes a day for 5 to 10 days. It is also available in 15 percent hydrogen peroxide, which will need to be worn 15 to 20 minutes a day, for five to 10 days. More about the Opalescence Go? prefilled teeth whitening trays can be gleaned at <https://www.opalescence.com/products/opalescence-go>.

Sumeet Kaur, DDS, a dentist at Family Dentistry in Rocklin, says, "For a non-invasive treatment that can add shades of brilliance to your smile, Family Dentistry in Rocklin offers professional teeth whitening. Whether seeking to regain natural coloration or modify the tone of their smile, we offer teeth whitening tailored to help you reach your aesthetic goals. One of the products that we offer for teeth whitening is the Opalescence Go? prefilled teeth whitening system. These are easy and simple to use and they can be used right out of the box."

There are various situations where it is advisable to use professional teeth whitening to address dental staining. These include the use of medications that can have a cosmetic impact on the teeth and discoloration resulting from too much fluoride exposure. People with yellowed teeth resulting from the normal wear of the outer layers may be able to see some improvement after teeth whitening. Also, teeth whitening can minimize the stains caused by drinking coffee, wine or tea, as well as the stains caused by smoking.

Family Dentistry in Rocklin offers various cosmetic and restorative dental procedures, including teeth whitening. Cosmetic dentistry services include composite fillings, CEREC® system for ceramic restoration,

porcelain crowns, porcelain fixed bridges, and porcelain veneers. Restorations include dental implants, composite fillings, crowns, dentures and partial dentures, fixed bridges, and root canal therapy.

It should be noted that many of their previous patients of the dental clinic have provided highly positive reviews on their Google Maps page, earning them an overall rating of 5.0 stars. For instance, at <https://www.google.com/maps/place/Family+Dentistry+in+Rocklin/@38.7878276,-121.2301123,17z/data=!4m7!3m6!1s0x809b1f1aa5fc466d0x1460961a9bacd7cf!8m2!3d38.7878234!4d-121.2279236!9m1!1b1>, Megan S. had given them 5 stars and said, "Highly recommend. I have been coming to this practice for almost 30 years! Even though the practice changes, it has stayed a very nice, accommodating comfortable dental office. The ladies in the office are always nice and our daughter loves to pick from their chest of treasures. Speaking of our daughter, they are amazing with toddlers and do everything in their power to make them feel comfortable. Will continue to come here for as long as they are here."

Family Dentistry in Rocklin also provides periodontal disease treatment services. Periodontal disease is also known as gum disease and is a common inflammatory condition that affects the soft tissues of the tooth, eventually affecting even the jawbone in its most advanced stages. This is a progressive condition that eventually destroys connective tissue and jawbone. If it is not treated promptly, it can cause loose teeth, shifting teeth, and eventually tooth loss. Various treatments can be provided for periodontal disease. These include tissue regeneration, scaling and root planing, dental implants, and pocket elimination surgery.

Family Dentistry in Rocklin also offers cleanings and prevention services. These include dental exams and cleanings; dental x-rays; and advice for home care and how to properly brush and floss. They can also help patients overcome dental anxiety.

Those who are looking for teeth whitening solutions can check out the Family Dentistry in Rocklin website at <https://www.familydentistryrocklin.com/teeth-whitening/> or contact them by phone or through email.
