

Credit Repair San Francisco Firm Upgrades Equipment for Credit Repair Work

February 12, 2020

February 12, 2020 - PRESSADVANTAGE -

Poser Tubes Credit Repair - San Francisco, California, has announced that they have recently upgraded their equipment for credit repair work. They are a credit repair San Francisco company that offers help to people who have low credit scores. This upgrade in their equipment is aimed at providing better and faster service for their clients. Their service is for people whose credit score has been damaged due to a number of different reasons. These include collections accounts, judgments, foreclosures, late payments, charge offs, paid charge offs, payments where the amount paid was less than the amount due, and bankruptcies.

Cliff Cooper, spokesperson for Poser Tubes Credit Repair - San Francisco, says, "We're so excited to reveal that we have recently upgraded the equipment that we use for our credit repair work. With this development, we expected to better serve our clients with faster services. We've been helping people repair their credit scores, and we can help you too. With our credit repair service, you'll only pay when items are removed from your credit report. If you need your credit repaired fast, don't let 'monthly credit repair companies' take their time working on your credit. We'll fix your credit fast so you can move forward with your important life purchase."

What distinguishes Poser Tubes Credit Repair - San Francisco from other companies that offer the same service is that they provide a 100 percent risk free guarantee. This means that clients are assured that negative items will be removed from their credit history. With the said guarantee, if the client's credit score does not go up, they will issue a full refund. Those who are interested in credit repair San Francisco clients can depend on, may want to contact them at any time and request for a free quote.

With their team of experts, they can help people in San Francisco enhance their credit score by getting rid of negative items that have somehow found their way into their credit records. The company will contact the three major credit bureaus to get their clients' credit reports so that these can be carefully scrutinized for any mistaken entries. If it can be proven to the credit bureau that those entries are erroneous, they will remove them with the result that the credit score will immediately go up. The company can also offer advice to clients on how they can improve their credit score and maintain it. However, they would like their clients and potential clients to realize that rebuilding credit is a long process. It could take weeks, months or even years before credit is fully repaired. Nevertheless, people will be able to notice some improvements in the score within six months to one year.

What makes Poser Tubes Credit Repair stand out from the crowd is their 'pay per performance' principle. Clients will only need to pay a low monthly fee, while negative items on their credit report are being worked on so that they could be removed. In contrast, other companies will charge a huge configuration fee and only then will they start filing disputes. It should also be noted that the company can function 100 percent by remote, which means that they can help all kinds of people from various places in the United States.

Meanwhile, people who have already used their credit repair services have left highly positive reviews on their Google Maps page. For instance, Lindsey C. has given them a five star rating and said, 'This company is very honest. My brother recommended them after they helped him fixed his credit. When I explained my credit situation, they were a wealth of information and gave me a lot of tips about how to improve my credit. They were also forthright about his services not being necessary at the current time. They didn't try to needlessly charge me. I would not hesitate to use his services in the future.'

People who would like to know more about the credit repair San Francisco residents can use may want to visit their website or contact them on the telephone or through email. They are open 24 hours a day, from Monday to Sunday.
