

Cestari's Kitchen Scissors Enthusiastically Received Upon Release

February 20, 2020

LITTLETON, MA - February 20, 2020 - PRESSADVANTAGE -

Cestari Kitchen is proud to announce that its recently released patented kitchen scissors have been enthusiastically received by consumers and professionals alike. The scissors which were an immediate success when released have received many highly positive reviews.

Cestari Kitchen is renowned for its innovative and high-quality kitchen gadgets and the company's kitchen scissors live up to the company's high standards. They are, however, much more than just a simple pair of scissors. They are a true multifunction kitchen tool that almost defies description.

The scissors are full tang, which means that the metal forming the blade in each of the two halves of the scissors is one solid piece that continues right through the handle. A full tang is not only a sign of quality but gives the shears great strength when heavy cutting, such as through sinew and bone, is required. As one reviewer stated, "I could take these scissors into battle with me. These are the sturdiest kitchen shears I've ever seen. I thought my Cutco scissors were good. But these are amazing and they are a fraction of the price

of a pair of Cutco shears.?

Apart from the expected shears cutting function there are an additional ten functions that these shears are capable of fulfilling. Kitchen shears are easy to acquire, but kitchen shears of this quality and this many functions are not, and it is undoubtedly this combination that has led to so many 5-star kitchen scissors reviews on Amazon.

An inside section of the handles can function as nutcrackers and the same area performs double duty as a twist top bottle opener. If the bottle is not a twist top, then at the end of one of the handles is a standard bottle opener. At the end of the other handle is a uniquely shaped flip top lifter. Yet another section of the handles acts as an herb stripper.

Each of the blades is truly multifunctional and at the end of one blade is a screwdriver. The end of the other blade can act as a shrimp deveiner and the outside edge of this same blade is a fish scaler. Cestari's innovation does not stop there, however. The blades come apart which makes for easy washing of course but each scissors blade can now act as a knife. One with a plain edge as a paring knife and the other as a serrated edge knife. In addition, one of them can be used as a vegetable peeler.

It comes as no surprise perhaps that one review is titled "The Only Kitchen Scissor Shears You'll Ever Need." The reviewer went on to say, "It's difficult to imagine getting excited about food scissors, but when these shears arrived just in time for Thanksgiving and the holidays, I was impressed from the start. The premium professional packaging was luxurious and unexpected. The very comfortable rubber-like handle grip kept these shears from slipping even when my hands were greasy. They cut through the thickest bones on our turkey and chicken, then sliced right through the bacon, and chopped a salad without causing my hands to ache or get sore."

The scissors have been designed with Cestari Kitchen's usual attention to detail and thoughtfulness, not only to be multipurpose but to save cooks and chefs time and effort by being their go to utility tool. Attractively packaged in a high-quality presentation box the scissors would be an ideal gift for anyone who loves cooking.

Based in Massachusetts, Cestari Kitchen is a family-owned and operated business. The company is well known for its commitment to quality and creative innovation and its kitchen gadgets and equipment are highly regarded by amateur cooks and professional chefs alike.

Anyone interested in purchasing or finding out more about the scissors can visit the company's website or its Amazon Store. Further verified reviews about the best kitchen scissors Cestari has released to date can also

be found on its Amazon Store pages.
