

New Maintenance Packages Available At Burbank Auto Repair Specialist

February 15, 2020

February 15, 2020 - PRESSADVANTAGE -

Newbury Park, CA based Star Automotive LLC is pleased to inform vehicle owners in the area that they now offer a new range of maintenance packages. Interested parties may find the company online and download directions to their premises at the following link: <https://maps.google.com/maps?cid=1650075881780902903>.

According to the company, each package has been carefully designed to adapt to a wide variety of customer needs and preferences. Star Automotive knows that an individual's vehicle is often among their most prized, if not vital, possessions, so they endeavor to provide maintenance and repair services that match what their customers require at highly attractive rates. It is for this reason that they advise drivers to look into their maintenance packages. It is often easier and less time-consuming to run maintenance on a vehicle than it is to repair it once an issue escalates.

Star Automotive is fully aware that their customers' vehicles more often than not are their most convenient mode of transportation, particularly for their daily commutes. Even if they decide to temporarily resort to public transport or taxi services to make their commute every day, this is not an option that a car owner would feel comfortable relying on for an extended period of time. Furthermore, certain safety concerns may compel

some customers to shift to more expensive transport alternatives. At one end of the spectrum, this can cause an irritating dent in a person's travel budget. In harsher scenarios, it may also force them to forego other expenses to maintain that expenditure till their own vehicle is back on the road.

As such, the company states that they always do everything in their power to get their customers' vehicles back to them in short order. On one hand, this allows people to drive at their own leisure without having to adhere to public transport times or expensive taxi fares. On the other, it allows Star Automotive to help a wider range of customers. The maintenance and repair service adds, "It is easy to see why we place such a heavy priority on good service. The more people we are able to help, the more successful we are as a company as well. If you have any trouble with your car, come see us and we'll do everything we can to help you out."

While Star Automotive has no qualms about meeting new faces and taking on new customers, many of the people who initially approach them for help tend to stay on due to the quality of their repair and maintenance service. This is evident in the company's online reviews. For instance, Oscar Fleischmann says in their 5-Star review that Star Automotive is the, "Best repair shop ever. I am extremely thankful to Walt and his crew. They were able to fix my car when no one else could figure out what was wrong with it years ago. They have been taking care of my vehicle ever since, and I've never been disappointed. I find them to be very transparent, communicative and honest. I highly recommend Star Automotive!"

Similarly, the company believes that building trust with their customers is vital to ensuring a car is fixed in its entirety. "If they trust us to do the job well, they'll tell us everything they noticed was wrong with their car before we begin," says Star Automotive. "We don't want customers to be worried about hidden prices or other unsavory industry practices when they speak to us. For this reason, we maintain as much transparency as possible and give them the option to select what they want done, along with our recommendations. The final choice is theirs, of course, and the same is true of our new maintenance packages." All a customer has to do is inquire with the company's representatives to learn what each package entails.

Irwin Birks touches on this in their own 5-Star review as well, where they say they received an, "Incredible service! Always happy to bring my car here. They have the most detail-oriented and informative professionals I've ever met in the auto world. The first time, I brought my car in for a new battery because someone eroded it with a "special cleaner" they used. Ever since then, I have kept coming back. This place is truly incredible! I wouldn't bring my cars anywhere else!"
