

Raintight Advises Planning Ahead For Spring Construction Of Screenrooms

February 15, 2020

February 15, 2020 - PRESSADVANTAGE -

O'Fallon, MO based Raintight Decks & Screenrooms is advising local homeowners to begin planning their outdoor projects ahead of the approaching spring season, with a particular emphasis on screenrooms. Raintight believes that this will enable them to put their plans into motion as soon as the weather permits, and the company is ready to offer their assistance in these endeavors as well.

Raintight states, "If you start making plans for the upgrades you want to make to your outdoor spaces now, you have a lot of time to make important decisions regarding your needs and preferences. You can then get in touch with us and let us know what you want done or ask for our help putting the finishing touches to your plans." The company's area of expertise lies in giving homeowners the ability to maximise the use of their outdoor spaces without having to deal with biting insects and similar annoyances.

Screenrooms fundamentally increase the amount of living space that a home has at its disposal. They can be built on an existing deck, molded to fit within the house's existing structure, or they can be designed and

implemented entirely from the ground up. They also require much less maintenance than other alternatives, such as patios. This is because they are relatively unaffected by changing weather patterns. Rain or shine, a screenroom will endure, and a house's residents can often enjoy the benefits of both types of weather at their leisure. Notably, they even require less effort to keep clean?patios, for instance, tend to need to be cleared of leaves and other detritus from time to time. They would also need a new coat of paint from time to time, unlike screenrooms.

This further means that families have an added degree of safety, should they want to put their children or pets in contact with the outside world without undue risk or hassle. Raintight says, "The little ones and fur-babies can get some fresh air within the safety of a screened-in structure so that you don't have to worry about their well being. Screenrooms also offer protection to you and your loved ones against harmful UV rays from the sun." Notably, the shade provided by such porch screen systems serves to cool the house as a whole, which is an important advantage to consider as spring will give way to the summer heat in only a few short months. In turn, this means that the house's air conditioning system will have to work less?thereby reducing utility costs.

Each screenroom can be custom-built as per the customer's specifications, whether this means they want to prioritize function, form or wish to employ a suitable combination of both design sensibilities. They boast a high degree of durability as well. Raintight explains, "Unlike vinyl and wood, the aluminum we use to construct our porch screenrooms will not fade, rust, sag or melt, and colors are baked on. This ensures you won't need to re-paint your enclosure or replace any structural elements. All of our porch screenrooms are built with durable materials that are designed to last a lifetime." They add, "Screenrooms add value to your home and allow you to enjoy the outdoors without the hassle of biting insects."

Homeowners will be pleased to learn that the company provides free in-home consultations for customers who want to explore their options. The professional technicians sent over by Raintight will be able to look over the house in question and figure out what needs to be done in order to erect a screenroom. They even go so far as to create concept drawings that can help the homeowner preview what the project will look like upon completion.

Raintight states, "When you're satisfied with the design, our team of experienced professionals will install your screenroom so that you can start enjoying it right away. With our help, you'll have a high-quality screenroom to enjoy for many years to come."

Those who wish to learn more about the company's custom built screenrooms may reach out to Anne Seibert of Raintight Decks & Screenrooms to inquire further. More information can be found on their

official website as well, and social media users may follow the company on Facebook, Twitter and more to stay abreast of their latest news and announcements.
