

ICEY-TEK Teams with Task Force Dagger Foundation to Support U.S. Special Operations Command Service Members and Their Families

February 14, 2020

February 14, 2020 - PRESSADVANTAGE -

ICEY-TEK USA is proud to formally announce their support of Task Force Dagger Foundation which helps wounded, ill, or injured US Special Operations (USSOCOM) members and their families.

“As we grow as a company, we are always looking at ways to expand our support of the military communities we came from,” explained ICEY-TEK USA co-founder and U.S. Army veteran Jack Schoenberger. “An example of that is our formal addition of Task Force Dagger Foundation to our evolving list of featured causes we directly support. Most of my military career was spent assigned to units that are part of U.S. Special Operations Command. Plus, my wife is an active-duty Army officer assigned to a USSOCOM unit. This is the community that has become our extended family and the community that Task Force Dagger Foundation serves. At ICEY-TEK we share the Task Force Dagger Foundation belief that those ties that bind are never

severed by illness, ETS or retirement.?

Task Force Dagger Foundation responds to Immediate Needs, conducts Rehabilitative Therapy Events, and provides next-generation Health Solutions for issues facing our Special Operations Forces (SOF). Task Force Dagger Foundation is a rally point to help SOF members combat Traumatic Brain Injury (TBI), Post Traumatic Stress (PTS), and participate in rehabilitative therapy events with their families. These programs help USSOCOM families heal and move forward as a family.

More specifically, Task Force Dagger Foundation assists service members and their families with immediate needs not covered by the DoD, VA, or their insurance. These needs are usually from a service member being wounded in combat, injured in training, or an illness that occurs on active duty resulting in hardships. The Foundation works closely with USSOCOM's Warrior Care Program to ensure that every need is vetted and verified and the service member and his or her family have the best assistance, not just financially but through family support programs, to ensure the best possible outcome.

For Rehabilitative Therapy Events (RTE), Task Force Dagger Foundation sponsors activities that foster a sense of well-being, offer encouragement, and assist service members' rehabilitation and recovery from wounds/injuries sustained while serving our country. One of the foundation's core beliefs is that if the service member is injured, the whole family is injured and must heal together. It is important that the service member and his or her family understand that they must bond and work as a team. It is because of this core belief in teamwork that the Foundation brings the whole family to Rehabilitative Therapy Events. These events include not only SOF wounded, ill, or injured and their families, but also Gold Star families and other families who have lost loved ones in the service of their country.

Through SOF Health Initiatives, Task Force Dagger Foundation is increasing access to and awareness of Personalized Functional Medicine Approaches that deliver Lifestyle, Integrative, and Nutritional interventions that address root cause dysfunction in the Special Operations Forces (SOF) community.

ICEY-TEK USA sets aside a portion of every purchase at checkout to go to a non-profit cause of the buyers choosing. The Task Force Dagger Foundation is now a featured cause on the ICEY-TEK website.
