

GadgetSource USA Launches Brand New Air Vent Gravity Car Mount Phone Holder

February 21, 2020

February 21, 2020 -
Lynden, Washington based GadgetSource USA is pleased to announce the launch of a brand new product, the Air Vent Gravity Car Mount Phone Holder. The company proudly claims that they are among the world?s leading experts for procuring trendy items suited for all customers and providing them at affordable prices.

According to the product description on the company?s website, the car mount phone holder is designed to be as compact as possible so that it does not occupy too much of the air vent?s space (which would make it an obstacle to the air conditioning system). Furthermore, the phone holder also has five points of support that serve to add a greater degree of stability. They ensure that the phone is kept safe by preventing it from shaking or causing any abnormal noise.

The design and materials of the product have also been carefully considered so that they do not affect the signal of the phone or block line of sight when the camera is in use. When a phone is placed in the new model of the phone holder, the silicone button will automatically lock onto it and then reset when it is

removed. GadgetSource USA also asserts that the new Air Vent Gravity Car Mount Phone Holder is easy to install and use?while also being smaller than their previous car phone holder.

The overall bracket for the Air Vent Gravity Car Mount Phone Holder is made of ABS, subverting the traditional structure of other similar products, and the rest of the phone holder utilizes a combination of aluminum alloy and silicone. It is available in three colors: red, black and silver, and it is suitable for 4-6 inch mobile phones. It also features 360 degree rotation capabilities.

Dan LHeureux, a representative for GadgetSource USA, says, ?We can say with absolute certainty that this new Air Vent Gravity Car Mount Phone Holder is something that pretty much everybody needs in today?s world. We all use smartphones in our day to day lives, and they have become quite integrated into everything that we do. As such, it is understandable that there are reasons for wanting to use your phone in the car?whether it is to use the GPS to navigate, talk with your friends and loved ones or simply order yourself some food?but there is still your safety to consider. Of course, there are also penalties for distracted driving. Our product solves these issues, providing you with a way to use your phone on the road that is safe for both you and your phone.?

He continues, ?At GadgetSource USA, we work around the clock to find, create, manufacture and ship to you nothing but the most innovative products. When you buy something from us, you can be sure that you are getting the coolest things money can buy without spending days researching on your own. So, we can easily say that the Air Vent Gravity Car Mount Phone Holder is the best phone mount you will own or use. You can trust our team of experts to help you stay ahead of the curve and always be on the cutting edge of technology.?

The product?s reviews are a testament to its high quality. In a review shared on the GadgetSource USA website, one reviewer says that they are, ?Using for iPhone XS Max, and really happy with how it works. I do like my phone to be in a case with a lid, so I was looking for a car holder that can provide good grip and be simple. I also don?t have to take the phone out of the case. This holder is actually doing it all.?

Those who want to learn more about GadgetSource USA and the various products they offer are encouraged to visit the company?s website to explore further. Additionally, the company invites interested parties to get in touch with Dan LHeureux directly via email or phone to follow up on any inquiries. Alternatively, they may get in touch with GadgetSource USA?s customer support team through the contact form on their website. In addition, GadgetSource USA maintains a presence on Facebook where they frequently post updates, share information on new products and communicate with their customers.
