

New Pressure Washing Service in Parkland FL Offers Roof Soft Washing

February 27, 2020

February 27, 2020 - PRESSADVANTAGE -

A new company that does pressure cleaning services in Parkland FL, is happy to announce they are now improving the looks of their customers' roofs using advanced no pressure cleaning techniques. This is an extremely effective roof cleaning process that does no harm to roof coverings such as metal, shingle, and wood shake. No pressure roof cleaning, also known as soft washing, is quickly becoming one of the go-to services that this new company offers.

The proprietor of the company, Brian Bustamante, had this to say about their roof soft washing service, "You can paint your house, scrub it, and decorate your landscape all you want but it won't help the looks of your home much if your roof looks unsightly. Factors that take away from the looks of any roof include dark stains from algae and mold growth, dirt buildup, and small debris that has accumulated on it. That's why so many turn to us to get no pressure roof cleaning done. It's the safest and most effective way to clean any type of roof covering material. Our roof cleanings techs are well-trained and experienced at doing roof soft washing and the quality results speak for themselves."

Bustamante says that this roof cleaning technique is very effective because of the detergent solution that is applied over the roof covering before it gets lightly rinsed with water. This specially formulated roofing solution lifts up even the most stubborn dirt and eliminates roof stains caused by mold, algae, and mildew growth too. The proprietor says that most of their customers rave about the way that their roof looks once they have completed the no pressure roof cleaning process.

This type of no pressure cleaning service has been well received by BKB Cleaning Company's customers too. Here is a review from recent roof soft washing customer Ken Cintron that says, "Fantastic experience using this company. Great job as the roof looks like new now. It even comes with a warranty promise and should last a good while. Cleaned up after he was done, so except for a clean roof, you never knew they were there." This is just one of 28 reviews found on the company's Google Maps business page. Every

single one of them rates the company's cleaning services at 5 out of a possible 5-stars. Many of these reviews specifically mention that the company did a great job cleaning their roof.

The company's owner was also quick to point out that they do many other no pressure and high-pressure washing services too. One of the most popular of which is their gutter cleaning services. Bustamante says that they recommend that everyone get their gutters cleaned at least once a year. He says that's because clogged gutters can channel water into places it's not supposed to go. Overflowing gutters can get under shingles and other roof coverings and cause leaks. They can also saturate roof structure materials and cause them to rot more quickly. Bustamante says their skilled cleaning technicians not only do a great job cleaning gutters but they also know how to do this cleaning task in the safest possible way.

Another popular service that BKB Cleaning Company offers is high-pressure washing. It's a great way to do such things as cleaning the siding on any home. The company owner says this is often done in conjunction with their no pressure roof cleaning service to get a home's exterior looking great all the way around. Bustamante stated that they will do home window cleaning if a customer requests it too. He says high-pressure washing can also be used to effectively clean sidewalks, driveways, and patio areas.

Bustamante went on to say that for those in Parkland and the surrounding Florida areas who are looking for 'pressure washing near me?', they can contact them by phone, email or by using the quick callback form on their website's home page. He added that they are always more than happy to answer any questions people have regarding the wide variety of high pressure and no pressure cleaning services that they offer.
