

TinyFrog Technologies Recognized as a Top B2B Agency

February 21, 2020

February 21, 2020 - PRESSADVANTAGE -

TinyFrog Technologies, a San Diego web design and development company, announced today that it has once again received Clutch.co's accolade as one of the top B2B companies in California.

Clutch is a Washington D.C. based, B2B research, ratings and reviews firm that aims to connect small and medium-sized businesses with best-fit solutions. Every year, Clutch seeks out leaders in the field of web design and development with superior industry knowledge within the B2B sector. Their ranking of these top service providers is based on an exceptional track record of consistently high-caliber work, attentive customer service, and a wide ranging portfolio highlighting a diversity of projects and clientele.

"It's an honor to be recognized for our service to B2B companies, whom we've been committed to for many years," says Mikel Bruce, founder and CEO of TinyFrog. "We strive to create high-quality websites that help B2B businesses grow and engage new clients."

Additionally, TinyFrog has been awarded a place on the prestigious global top 1,000 B2B provider list for 2019. As the most exclusive award on Clutch's platform, it recognizes outstanding service providers who

rank within the top 1% of all companies assessed by Clutch. The ranking algorithm assesses the recency, quality and quantity of verified reviews, the reputation and visibility of the company in its niche market, its portfolio of clients, and services offered.

This is TinyFrog's second year in the top 1,000, confirming its status as an industry leader in the global B2B market. TinyFrog specializes in WordPress website design and development, with a focus on B2B web design in many industries, including finance, technology, insurance and consulting companies.

TinyFrog has a unique conversion-based approach to website design. Every web project starts with in-depth research into the roles of the clients' typical visitors, and each of their needs and objectives on the site. By pairing these UX strategies with custom design work, TinyFrog creates a site that is both first-class in aesthetics and an effective marketing tool.
