

Renowned Dentist in Del Mar California Uses Ultramodern Technology

March 02, 2020

March 02, 2020 - PRESSADVANTAGE -

Solana Beach Dentistry, also known as Solana Family Dental, based in Solana Beach California, which also offers dental services in Del Mar, uses ultramodern technology and best practices to serve patients. Dr. Michelle Sandler, who now operates the dental office after her mother who is also a dentist, Dr. Wanda Kauffman, retired in 2018. Dr. Sandler had been recognized in 2019 as Top Dentist in San Diego. Located in scenic Solana Beach, they are completely focused on making the patients' visit to the facility comfortable and memorable.

Dr. Michelle Sandler says, "We are a family dental care practice, based on a philosophy of providing patients multiple options so they can make informed and educated decisions regarding their dental treatment. We fill the full needs of each family for all general, as well as cosmetic dentistry. We are lucky to have an array of outstandingly competent and caring specialists to refer our patients for work that we do not do ourselves in order to provide our patients with an integrated network for each and every conceivable aspect of dental care. And we ensure that we have the latest technology so that any discomfort in the procedures we offer is minimized."

At Solana Beach Dentistry, they offer comprehensive family dentistry by hands-on dentists. Those who are looking for a dentist Del Mar families can rely on, may want to check out this particular dental office that is committed to creating an environment that's ideal for the whole family. They provide a friendly and relaxed environment for kids, teenagers, and adults. An initial visit of a family to the facility will usually include the following: initial dental examination, comprehensive dental cleaning, and recommendations for any further dental procedures if needed.

Solana Beach Dentistry also offers all kinds of cosmetic dentistry services, from the simple to the sophisticated. They make use of a wireless digital scanner with high scan speed and Patient Specific Motion feature to perfect dental restorations. They can provide porcelain veneers that can be used for chipped, oddly shaped, unevenly spaced, and discolored teeth. These veneers are so durable that they can last for many years without need for replacement. And if the damage to the teeth is not bad enough to require crowns or implants but are too extensive for fillings, inlays and overlays can be used.

Dental implants can also be provided. An implant is an artificial root placed by the dentist in the jaw for holding a replacement tooth or bridge. An important advantage of teeth replacement using implants is that the artificial teeth look more natural and feel more comfortable, and may last a lifetime if cared for properly. They are usually a better option compared to a fixed bridge because the neighboring teeth are left intact.

For those who require tooth alignment, they offer one of the greatest advancements in orthodontics in the past decade, which is Invisalign. The Invisalign and Clear Connect procedure that they offer involves the use of transparent incremental aligners to adjust teeth. These aligners can be used in place of the conventional metal braces and porcelain veneers. The procedure requires taking a computerized model of the patient's teeth structure and then the model is then scanned and the required movement is then designed and the clear trays are engineered to correct the misalignment. An additional advantage of Invisalign and Clear Connect is that the aligners, unlike traditional braces, can be removed so that patients can eat anything they want. Brushing and flossing will also be easier and more efficient.

Solana Beach Dentistry also offers proper treatment for periodontal disease. Periodontal disease begins with inflammation of the gums and this progresses into a situation where the gums turn red, which is a condition known as gingivitis. This condition requires treatment because if left unaddressed, it could lead to loss of bone and support around the teeth.

Those who are interested in quality dental services in Solana Beach or Del Mar can check out the website at <https://solanabeachdentistry.com/>, or contact them on the phone or through email. They are open from Monday to Thursday, from 9:00 am to 5:00 pm.
