D.I. Auto Care Provides Window Tinting In Phoenix, Arizona

March 16, 2020

March 16, 2020 - PRESSADVANTAGE -

D.I. Auto Care, a car detailing service based out of Phoenix, Arizona, is providing window tinting services within the city as well as its surrounding areas. The company specializes in providing a variety of auto detailing services for many types of vehicles, including cars, trucks, motor coaches, RVs, planes, boats, high-performance cars and more. More information about the company and the services they provide can be found at the following link: [Window Tinting Phoenix](#).

According to D.I. Auto Care, there are many good reasons why someone might want to apply an aftermarket tint to their vehicle's windows. Many vehicle owners choose to apply window tinting to protect their privacy. Depending on the visible light transmission levels of the tint being applied, car owners have the option to make it more difficult for another person to see inside their vehicle. Window tinting can also block up to 99% of harmful ultraviolet rays from the sun, which will help keep the interior of the vehicle in better shape and protect the driver's skin. Maintaining the vehicle's interior can be a very important thing when it comes time to sell the vehicle as well, given that well-maintained vehicles can be sold for a better price.

D.I. Auto Care also points out that vehicles with tinted windows can have up to 70% less interior heat, which can be very useful for car owners who live in high heat climates such as the south. While not a direct benefit, there is also the fact that a tinted window can keep glass from shattering in the unfortunate event of an accident. According to the company, while the windows of most modern vehicles are all tempered or laminated, which reduces the likelihood of glass shattering and hurting the vehicle's occupants, window tinting provides an additional layer of security as the adhesive in the window tint can result in fewer loose pieces of glass after the window is broken.

Paul, owner of D.I. Auto Care, says, "As you should know, there are many good reasons why you might want to apply an aftermarket tint to your vehicle. Some vehicles do come with a tint, but that's only done for the rear windows and maybe just the top of the front window. That's not enough if you want to take advantage of all the benefits of tinting. If you want to get all your vehicle's windows tinted, stop by D.I. Auto Care and we will take care of you."

The services provided by D.I. Auto Care have earned the company a lot of praise from their clients. On Google, the Phoenix window tinting service has a near perfect rating of 4.8/5 Stars. In one such 5-Star review, Gabriel Alviar says, "I just got home from a 4-day road trip with my wife, and the car was a disaster. It was covered in bugs, food and coffee stains. I called [the company] right down the road from my work to come detail it. Paul did an amazing job. I didn't think all of the bugs would come off but they did. My Mercedes looks great again. Next time, we will take the wife's car."

Meanwhile, in another 5-Star review, Paul Kealoha praises the company's mobile window tinting service, saying, "Just had my windshield replaced and also removed my old window tint and re-tinted the windows a little darker. Service was excellent. He came to my office. Very easy and painless, I didn't need to take off from work to get it done." Similarly, John Kais says, "I was selling my car so I needed to get it detailed to get the most money out of it. I found Paul online, and he had great reviews so I gave him a call. He arrived on time, and the car looked better than brand new. I posted the car with pictures on CL, and the car was gone by that afternoon. Truly amazing work. Thanks, Paul. Great job."
