Sinkology Launches Its New Line Of Stainless Steel Kitchen Sink

March 05, 2020

March 05, 2020 -
Sinkology, a manufacturer and supplier of quality kitchen and bath products, is proud to introduce their new line of handcrafted stainless steel kitchen sinks. Sinkology?s FORTIFY collection boasts a combination of quality and durability with a touch of elegance and sophistication.

Sinkology?s FORTIFY sinks are hand-crafted and hand-hammered by skilled artisans. They feature a unique surface texture that is generated by this manual hammering process. As the metal is hammered, it becomes more dense and durable, while also leaving an uneven and beautiful pattern. The FORTIFY collection comes in five unique sets of stainless steel sink models, namely: Wilson, Taylor, Percy, Anning, and Graham. The Wilson bar/prep sink is the smallest item in the collection at 17 in.; the Taylor is a 31.25 in. single bowl undermount sink; the Percy is a 32 in. single bowl farmhouse sink; the Anning is a 32 in. double bowl farmhouse sink; and lastly, the Graham is a 33 in. single bowl drop-in sink.

The company states that the sink models under the FORTIFY collection come in two different surface finishes. ?Our stainless steel sinks are crafted in two finish options: brushed and polished. From bright and shiny to understated and alluring, Sinkology wanted to satisfy our customer's personal preferences,? explains the company. The brushed finish offers a subtle, matte surface that graciously hides fingerprints and smudges, while the polished finish creates a lustrous, high-shine surface that is guaranteed to grab attention.

Sinkology also highlights the benefits of choosing stainless steel kitchen sinks. Stainless steel, for instance, is one of the most durable types of industrial metals and is known for its high resistance to chipping, cracking and wear and tear. They are also significantly cheaper when compared to other materials, such as cast iron, brass, quartz, granite, etc. The cost savings of using stainless steel sink can then be used to purchase other home fixtures and accessories. Stainless steel sinks are very easy to clean and maintain as well. Aside from being stain-proof, stainless steel does not harbor bacteria.

In addition, since stainless steel is malleable and lightweight, it can be molded into deeper and bigger sinks, which is not possible with sinks made from other materials. Stainless steel is also an eco-friendly material

since it can be recycled over and over again without losing any of its properties in the process. As stainless steel basins do not rust, they will look good and presentable for as long as they are properly cleaned and maintained. Last but not least, stainless steel can last longer when compared to other types of materials that need to be replaced every few years.

On the other hand, the company points out that homeowners should take note of the gauge of the steel before buying a stainless steel sink. As a general guide, they assert that the 16 and 18 gauge steel makes the best stainless steel kitchen sink. The difference between the two is not that pronounced, and the price range is almost the same. The 16 gauge has a thickness of 0.0625 inches while the 18 gauge is 0.05 inches thick.

Sinkology is known for their quality handcrafted stainless steel sinks that come with a lifetime warranty to ensure their durability. In addition to stainless steel sinks, the company also designs and supplies unique copper sinks with the highest-grade of solid, pure copper, boasting a durability that lasts a lifetime. With beautiful fireclay and striking granite composite options, homeowners are sure to find exactly the style they need for their home. Sinkology?s quality kitchen and bath products are expertly designed and handmade by skilled artisans, and they also undergo a stringent QA/QC test for quality and functionality. Furthermore, the company also provides a lifetime warranty on all of their products.

One satisfied customer, Brian Clowdus, says in their Facebook review, ?Hands down some of the best customer service I?ve ever had. Products are gorgeous and affordable. I can?t recommend them enough. They have a lifelong customer with me.?

Complete details can be found on the company?s website at https://www.sinkology.com/stainless-steel-sinks/.
