

# Cockroaches Don't Stand A Chance With This Orange County Exterminator

*February 25, 2020*

February 25, 2020 - PRESSADVANTAGE -

Pest Control of Orange County has been taking a lot of calls recently regarding cockroaches in the Trabuco Canyon, CA area. Both homes and businesses have been battling this invasive pest. "Our extermination team has been staying pretty busy handling the many calls for cockroaches in homes and commercial properties throughout the area. There has been a noticeable increase in calls over the last month," the business owner said.

Cockroaches are a pest that thrives in any environment, clean or dirty. They seek shelter and then they multiply rapidly. These particular pests can carry and transmit diseases to humans so it's imperative that a person doesn't continue sharing their space with roaches.

Roaches can be dealt with via DIY solutions but this approach can take more time to achieve desirable results. Hiring a professional cockroach exterminator can lessen the burden for the property owner. "Our specialists know what works and how to achieve the results you want in less time and hassle. Trying to handle them on your own is feasible, but not many property owners have the patience or time to do this. Letting our exterminators come in and handle the issue means you can expect results faster and complete removal in a shorter amount of time," the owner said.

There could be a reason that the roaches are invading a property or they could simply be coming from a nearby structure, passing through. Unfortunately for any property owner, should the roaches find food, water and shelter, they may stick around.

Orange County residents can help protect their property by clearing out items that may encourage roaches to invade. This includes stored paper items; boxes, newspapers, books, etc. Keeping floors swept and vacuumed regularly can help keep them away and sealing up any entry points is critical so they don't continue coming in.

"These bugs can be very frustrating to deal with but there is hope. Our roach exterminators are determined

to give you peace of mind and deliver the results you want. If you have any questions about our roach control services or any other pest issue, we encourage you to call us right away. Many times we can determine what needs to be done by phone once you explain the problem,? the manager said.
