Local Prosthodontists Provide Pain-Free Dental Implants In Louisville, KY

March 05, 2020

March 05, 2020 -
Louisville, Kentucky based dental clinic Renew Institute: Beyond Dentistry is reaching out to the wider community to announce that they are providing pain-free dental implants. The clinic provides a full scope of prosthetic and cosmetic dentistry, and their expertise extends to dental implants, crowns, dentures, bridges, veneers and much more.

With the help of the clinic?s state-of-the-art Sedation Dentistry, patients can improve the look and function of their smiles without experiencing any pain at all. While implant surgery can sometimes hurt, patients of Renew Institute do not have to be concerned with this drawback. According to the clinic, implant surgery can be performed with a local anesthetic or full sedation, depending on the preference of the patient. However, Renew Institute believes that they can reduce the pain to almost nothing by utilizing a team of sedation specialists.

The clinic explains that deep sedation allows them to avoid the use of local anesthetic, which in turn minimizes inflammation and avoids unnecessary injury to the tissues from injections. It also serves to increase blood flow to the surgical site by avoiding medications, like epinephrine, in the anesthetic (which cause the vessels to constrict). Further, a relaxed and sedated patient has less tension in the jaw muscles, which in turn means they will not get sore. Patient records are more accurate in this state. It is a point of pride for the dental clinic that a vast majority of their patients report little or no pain.

Dr. Ryan Wayland, one of the doctors at Renew Institute: Beyond Dentistry, says ?Our office and our staff are centered around you. Dental problems, both aesthetic and functional, are handled with the psychological experience of the patient in mind to ensure you experience as little pain as possible while in our care.?

Renew Institute is proud to say that they are at the forefront of engineering in a new era of dentistry across Louisville and the surrounding areas. With the techniques and equipment at their disposal, all key aspects of

dental care can be performed at their office, under one roof and with minimum pain for their patients. From implants and bridges to surgery and lab work, all of their work is performed in-house by their renowned prosthodontists, dramatically improving patient care, comfort and satisfaction.

The team at Renew Institute is committed to providing a refreshing dental experience to all patients who require full mouth reconstruction and/or single dental prosthetics, and they pride themselves in solving complicated dental circumstances with uncomplicated strategies. The clinic?s doctor, Dr. Ryan Wayland, is a prosthodontist with three additional years of training beyond dental school. His advanced training also affords him the expertise to diagnose and treat the most complicated of crippling dental circumstances.

The services provided by Renew Institute: Beyond Dentistry have earned the clinic nothing but praise from their patients. The prosthodontists in Louisville, KY have a perfect 5-Star rating on Google. Lucretia Vaugh says in her recent review, ?Where do I start? Renew Institute: Beyond Dentistry is beyond amazing from the time you step in the door. The girls at the front desk are professional and friendly, and all the other ladies in the back are very helpful. I have been going here for over a year, and they have made me feel so at home and have helped me meet all my dental goals. Dr. Ryan Wayland & Dr. Charette are both so professional, and they take the time to explain everything. Also, they have a great personality and will make you laugh. I have always dreaded going to the dentist but now I look forward to every visit. I even drive two hours one way just because the whole crew is amazing. Y'all truly rock.?

Another review says, ?Drs. Wayland and Charette really took the time to understand my concerns and explain my options to possibly address in the future. I especially appreciated Dr. Wayland's understanding of, and comments related to, my complicated dental past and my long pursuit (10+) years to have my jaw properly treated?these issues have caused me a lot of emotional distress over the years (though I have gotten better at containing that), and I never really found the understanding from other dentists that he seemed to have, and it has often felt hopeless. His words give me some hope of potentially addressing it in the future.?

Those who want to learn more about Renew Institute: Beyond Dentistry and the various services they provide can find more information at the following link: https://www.renewinstitute.com/. Additionally, the clinic encourages interested parties to get in touch with Dr. Ryan Wayland directly via email or phone.
