

# Phoenix Company Offering Mice Extermination Services

*February 29, 2020*

February 29, 2020 - PRESSADVANTAGE -

For residents in Phoenix, AZ dealing with mice doesn't have to be an annoying problem anymore. Phoenix Pest & Rodent Specialists is offering mice extermination services for both homes and businesses throughout Maricopa County. The business owner stated that mice are one of the most common pests in the area.

The owner added, "While it's important for property owners to have a pest control plan in place 12 months out of the year, there are times when individual pests will be a more noticeable problem. Mice, for example, have the ability to wreak havoc on your property all year round."

The company says that property owners should have an inspection prior to cold weather months moving in and then again prior to warmer weather arriving. "By taking proactive measures you can ensure the mice don't immediately make their way inside your structure. Our local pest control experts in Phoenix can help," the manager said.

Mice can fit through small spaces so it's easy for them to gain entry if there are any holes, cracks or crevices on the property's exterior. Having mice can be hazardous to the occupants as well. They can cause allergic reactions and even skin irritation.

"One of our techs will carry out your rodent control service in Phoenix. They will inspect your property in order to determine if there is an existing problem, in addition to identifying any entry points. From there they can create a treatment plan and give you more details about our recommendation," the manager said.

If caught early on a mice problem won't be as hard for a local exterminator to remedy. The more serious the infestation the longer property owners can expect it to be before they start noticing the best results. To discuss more details about the mice extermination services offered by Phoenix Pest & Rodent

Specialists they can be reached by phone or online at [pestcontrol-phoenix.net](http://pestcontrol-phoenix.net).
