D.I. Auto Care Offers Window Tinting in Ahwatukee Phoenix Area

March 03, 2020

March 03, 2020 - PRESSADVANTAGE -

D.I. Auto Care has announced that they are offering window tinting in the Ahwatukee Phoenix area in Arizona. They offer window tinting Ahwatukee residents need for their motor vehicle, home, or office. They point out that window tinting offers several advantages. These include the reduction of heat inside the home, office, or car; increase in privacy; reduction in cooling costs by up to 50 percent; possibility of preventing glass from shattering; and blocking of 99 percent of harmful ultraviolet rays from the sun.

A window tint will block UVA and UVB rays, which may cause cancer. Also, it will keep a large percentage of the sun's heat from getting in, which means lower cooling costs. It will also make the car look better, which in turn will make the car owner feel better while driving in traffic while the sun's heat is at its highest point. This, while it may be costly to get a car professionally tinted, there are a lot of benefits to enjoy from it.

Paul, a spokesperson for D.I. Auto Care, says, "The reason that professional tinters get paid so much is that window tinting is not as simple as slapping on a bumper sticker. It takes years of training and practice to learn

how to shrink film to make it fit the back window, most newer vehicles have curved glass which makes it very difficult to shrink the film to fit the shape of the glass. You can buy Pre Cut kits for your vehicle online and you still have to shrink the film to fit the glass, I highly recommend getting it done by a professional tinting company. Whether you're tinting your vehicle using 100-foot rolls of film or using a pre-cut kit you can buy online it is always a good idea to get the help of a professional tinter. Thus, for those who are saying, "I'm looking for window tinting near me," check out the D.I. Auto Care website.?

Aside from window tinting, D.I. Auto Care also offers auto glass windshield replacement and repair. There are various reasons why car owners may want to have their auto glass replaced but it may be a good idea to also consider windshield chip repair. Defects in the windshield may not seem to be significant for some people but these may decrease visibility, especially when driving into the sun or at night. This is critical particularly for the front windshield and rear window.

D.I. Auto Care professionals suggest that car owners first opt for the rock chip repair because it maintains the integrity and dependability of its factory seal. And with regards to car windshield replacement services, this is really needed to save the car from cracks, scrapes, pitting, and many other car windshield blemishes. Windshields often crack or get damaged due to several reasons.

Windshield rock chip repair involves the injection of resin that cures and then dries into the chip resulting from the rock chip and this will seal the outer layer of the auto glass windshield. The repair of a rock chip is performed to restore the strength and integrity of the windshield glass to get rid of its chipped appearance. When professionally performed, a windshield rock chip repair can result into a smooth, invisible surface and the crack would no longer be able to spread or cause further damage to the glass windshield. Do it yourself windshield rock chip repair kits that are available in stores may be somewhat effective. However, without the proper tools and experience, it may result in further damage to the chip or make it appear more distracting.

Auto glass windshield replacement requires the complete removal of the front windshield, trim pieces, old urethane, molding, gasket, and putting in a new windshield. When professionally done, replacement should be able to at least restore the car safety to the original manufacturer's standards.

People who are looking for Ahwatukee mobile tint service, detailing, and other services can check out the D.I. Auto Care website or contact them on the phone or through email. They are open from 5:00 am to 10:00 pm, Monday to Sunday.
