Mobile Window Tinting Offered by D.I. Auto Care in Ahwatukee

March 27, 2020

March 27, 2020 - PRESSADVANTAGE -

D.I. Auto Care has revealed that they provide mobile window tinting in the Ahwatukee area in Phoenix, Arizona. They offer mobile window tinting Ahwatukee residents can depend on. Mobile window tinting has several benefits, such as the increase in privacy; reduction in cooling expenses by as much as 50 percent; reduction of heat inside the car or motor vehicle; prevention of glass shattering in case of a car crash; and prevention of 99 percent of harmful ultraviolet rays from getting inside the car or motor vehicle.

Paul, a representative for D.I. Auto Care, says, "Mobile window tinting is not as simple as slapping on a bumper sticker. It requires years of training and experience to learn how to shrink film and make it fit perfectly to the car window. Many of the new cars have curved glass car windows, which makes it extremely hard to shrink the film and make it fit the shape of the glass. It is possible to purchase Pre Cut kits for your care online but you still have to shrink the film and make sure that it fits the window glass. It is truly a good idea to have a professional tinting company do the window tinting task. Whether you're tinting your car with 100-foot rolls of film or using a pre-cut kit you can buy online it is always a good idea to enlist the services of a professional tinter."

The Ahwatukee mobile tint service car owners require has the capability to block UVA and UVB rays, which may be able to cause cancer. The tint will also prevent a substantial percentage of the sun's heat from getting inside the car, which in turn reduces cooling costs. The window tint will also make the car look more appealing, and the car owner will also feel better while driving in traffic even when the sun's heat is at its maximum. While it is usually costly to have a car professionally tinted, there are a lot of advantages that can be enjoyed from it.

Aside from window tinting, D.I. Auto Care also provides auto detailing whose purpose is to make the car look like brand new again. The detailing service has two parts: interior detailing and exterior detailing. Exterior detailing involves the cleaning of the exterior surfaces and components of the car. Aside from washing the car's exterior surfaces, a repaint may be provided to make sure that the car has a glossy finish. The chrome trim may also have to be replaced or cleaned. And the tires, wheels, windows, and other exterior parts of the car will also have to be cleaned. After washing the external parts of the car, these are then waxed and then polished to make the car shine.

Interior detailing involves deep cleaning of the entire interior cabin. This includes the cleaning of different kinds of materials inside the car, such as vinyl, synthetic carpet upholstery, leather, natural fibers, plastics, and carbon fiber composites. They will also vacuum and clean the interior of the car, and this includes steam cleaning and the use of brushes, and liquid and foam chemicals. Nonporous surfaces in the interior of the car will also have to be waxed and then polished.

They can also replace auto glass windshields whenever this is needed. This kind of service has several benefits. These include less expensive auto glass replacement; quick recovery; guaranteed satisfaction; lifetime warranty; and enhanced protection. In some situations, auto glass replacement may be a better choice than simply performing auto glass repair. One such situation is when the windshield already very low visibility because of the defects or chips. This is very dangerous for the car's driver and passengers, particularly when driving into the sun or driving at night.

When looking for professional services for application or replacement of window tint Ahwatukee car owners can check out the D.I. Auto Care website or contact them through the phone or via email. They are open from 5:00 am to 10:00 pm, Monday to Sunday.
