For Mobile Window Tinting in Ahwatukee, Car Owners Can Go to D.I. Auto Care

April 17, 2020

April 17, 2020 - PRESSADVANTAGE -

For mobile window tinting Ahwatukee car owners can go to D.I. Auto Care. This was announced by D.I. Auto Care, which offers the service also in Phoenix, Arizona. They also want to point out that there are a number of advantages in providing a window tint to a car. These include a decrease in air conditioning expenses by as much as 50 percent; increase in privacy; prevention of the window glass from shattering in case of a car crash; reduction of heat inside the car or motor vehicle; and prevention of 99 percent of harmful ultraviolet rays from getting inside the car.

Paul, who speaks on behalf of D.I. Auto Care, says, "Some people have the idea that mobile window tinting is as simple as slapping on a bumper sticker. On the contrary, it requires years of training and experience to learn how to shrink film and be able to make it fit perfectly to the car window. This is even more difficult today because new cars tend to have curved glass car windows, which makes it very difficult to shrink the film and make it fit the shape of the glass. We suggest that car owners get an expert window tinting professional rather than buying a pre-cut window tint kit and doing it themselves."

By enlisting the help of a professional Ahwatukee mobile tint service, car owners can be assured that the window tint will be done perfectly. Without the experience and knowledge of the experts, car owners who try to do it themselves may just end up getting frustrated or having an improperly done window tint. With a quality window tint, the car will look much better and the car owner will feel better driving the car, especially since the sun's rays, especially the UV rays, are prevented from getting inside the car. While it may indeed be expensive to have a car professionally tinted, there are many benefits to be enjoyed from it.

The professionals at D.I. Auto Care can also replace auto glass windshields whenever this is required. This kind of service has a number of advantages. These include quick recovery; guaranteed satisfaction; less expensive auto glass replacement; enhanced protection; and lifetime warranty. In a number of situations, auto glass replacement may be a better option than just having the auto glass repaired. One such situation is when the windshield already has extremely low visibility because of defects or chips. This is risky for the car's driver and passengers, and may lead to an accident.

Aside from the window tinting service, D.I. Auto Care also offers auto detailing. This is designed to make the car look like new again. This involves the detailing of the both outer and inner parts of the car. Exterior detailing of the car involves the cleaning of the external surfaces and parts of the car. The car's exterior surfaces will be wash, a repaint may also be done if need to provide it with a glossy finish. The chrome trim may also need to be replaced or cleaned. And the wheels, tires, windows, and other external parts of the car will also have to be cleaned. After washing, the exterior of the car will then be waxed and then polished to make the car shine like new.

Interior detailing will require deep cleaning of the whole interior cabin. This includes the cleaning of different types of materials inside the car, such as synthetic carpet upholstery, leather, vinyl, carbon fiber composites, and plastics. They will also vacuum and clean the interior of the car, steam clean it and use brushes, and liquid and foam chemicals. Nonporous surfaces in the interior of the car will to be waxed and then polished also to make them shine and look like new.

For professional application of window tint Ahwatukee car owners may want to visit the D.I. Auto Care website or contact them on the telephone or through email. They are open for business from 5:00 am to 10:00 pm, from Monday to Sunday.
