?The utility company called to inform me that our usage was over 10 times our usual,? the client?s review states. ?I immediately called Henco and four other companies. Henco was the most responsive. They came out the next day and found that a line under my house was kinked and spraying water into our crawl space. I wish I could say we were done. The reading was at about three gallons a minute. We had a locating company come out in the morning. and they marked the area of the line where the leak was. Henco was out digging it up and fixing our pipe by noon the same day. Remember, things come in threes! No less than a week later, our water heater gave out! I believe we are done for a while! Highly recommended and can't say enough. Thank you for helping our family! We appreciate your service and professionalism.?
