Vital Life Pro Launches Best Fruit Infuser Water Bottle

August 26, 2015

August 26, 2015 - PRESSADVANTAGE -

Vital Life Pro, a global company that aims to promote healthy lifestyles through innovative products, has recently launched its Fruit Infuser Water Bottle, the company's first product made available on Amazon.com. The launch of its product was posted on the company's website at <https://www.facebook.com/VitalLife>.

Vital Life Pro's fruit infuser water bottle is created for people on the go, weight watchers, and health enthusiasts, among many others. The product is designed to improve the taste of plain water through the infusion of fruits, herbs, and vegetables. Sophie Ellen, Vital Life Pro's founder, explains on <http://www.amztk.com/best-fruit-infuser-water-bottle>: "We recognized the need for a product that will address the problem of bland-tasting water. Our research showed a high number of people who just don't like the taste of plain water! Through our product, consumers can actually infuse the taste of their favorite fruits, herbs, and vegetables to dull drinking water, and eventually be hydrated 100%, all the time," she explained.

The fruit infuser water bottle is leak-proof, with its durable material making it tough to break when dropped. It is lightweight and portable, made to fit gym bags, tote bags, and carry-ons. The product is made from BFA-free high-quality Tritan plastic. Tritan is free from chemicals and toxins that can harm the environment. One of its many benefits is its easy-to-use design, which makes the product easy to fill and refill. One only needs to twist off the fruit infuser water bottle's top, undo the fruit infuser tube, then fill it with chopped fruit,

and twist it back again. Parents can also give their children's drinking water a quick boost through the product, while making sure that they stay hydrated by drinking the recommended intake of two liters per day. Weight watchers can also benefit from Vital Life Pro's fruit infuser water bottle, because drinking water is a quick way to increase metabolism needed to burn fat.

Infusing water with different combinations of fruits and vegetables is easy. Vital Life Pro's Pinterest page (<https://www.pinterest.com/VitalLifePro/>) suggests a lot of fruit and vegetable combinations to make plain water exciting to drink again. Details on the product can be found on its Amazon page, where the fruit infuser water bottle is sold.
