

Reputable Fresno Roofing Company Announces They Have Significantly Upgraded Their Website

March 09, 2020

March 09, 2020 - PRESSADVANTAGE -

Fresno Roofing Pros strives to be progressive in every aspect of their business including their website. That's why they have just recently completed several upgrades to that website. The improved website makes it easy for the customers of this roofing company to do such things as find out more information on their wide variety of services and it gives their customers more convenient ways to contact them.

A company spokesperson says this about why they decided to upgrade their website, "Just like a good roofing company invests in enhanced training for their workers and top-notch equipment, so too should they make period improvements to their website. That's exactly the reason why we decided it was time to make some improvements to our website. We felt it was necessary to keep up with the changes that have been made in the company over the last few years and give our customers a better user experience when visiting our website. So far our customers seem to be very happy with the improvements we have made to the website."

According to the company spokesperson, one of the biggest improvements they have made to the website is the detail they go into on the various roofing services that Fresno Roofing Pros offers. An example of that is

the web page that describes their roofing installation services. It goes over every step of the process from designing a new roof to actually building it and the guarantee that the new roof comes with after the project is finished.

Another section of the website that the company spokesperson says is vastly improved is their roof repair section. It now better describes how Fresno Roofing Pros does everything from replacing a few shingles that have blown off to finding and resolving major roof leaks. This section also goes over the wide variety of roofing materials that the company supplies and does repairs on. This includes both regular and designer shingles and highly decorative and durable metal roofing panels.

The improved website also has an improved commercial roofing services section. It goes over how the company does everything from commercial roof installations and replacements to repairing storm damage and resolving commercial roof leaks. This webpage also mentions that Fresno Roofing Pros works on both sloped and no-slope commercial roofs.

The spokesperson for this roofing company also says that the upgraded website now puts such important contact information as their phone number in more visible areas of the web pages. Several easy point and click company contact options have been added too. This includes a quote request form and a form that can be used to schedule a free roof inspection with the company. There is even a quick callback form that can now easily be accessed on the "Contact Us" page of the website.

Fresno Roofing Pros services are also very well received by those that have used them. Here is an example of that in a 5 out of 5-star review from Ari Montez that says, "Absolutely Perfect! We needed a new roof and this business did a fantastic job from start to finish. My biggest worry was the mess that would be left behind, but it turns out I had nothing to worry about. They left it spotless! I would recommend them for anybody looking for roofing work." Another happy customer, Jose Montez, had this to say about Fresno Roofing Pros service, "Awesome Workers. This is a company that can be trusted. Their workers were constantly busy while repairing our roof. These guys really care and want the best for their customers. They were even happy to help me deal with the insurance company. Very highly recommended!"

The roofing company spokesperson says they are always available by phone or email to answer any questions about their Fresno quality roofing services and they also welcome any comments or suggestions regarding the improvements they have made to their website. The spokesperson says this will help them make their website even better the next time they go to upgrade it.
