

QVS Tech Inc. Announces Launch Of New TCXO Oscillators

August 24, 2015

August 24, 2015 - PRESSADVANTAGE -

QVS Tech Inc. in Carlsbad, California, has announced the launch of a new product line of oscillators. Their 2.5mm x 2.0mm TCXO (QCT80) and TCVCXO (QCTV80) is a new ultra mini 2.5mm x 2.0mm TCXO package, the new smallest industry standard. Those who need more details can view website [here](#).

Alicia Scaglione of QVS Tech has released these statements regarding the product launch, "This mini TCXO / TCVCXO offers supply voltages from 1.8V to 3.3V to cover your lower power consumption applications. We strive to offer our customers the highest quality possible, and we believe that this new TCXO package fits the bill perfectly."

The product is available in Clipped Sinewave output with a temperature stability of +/-0.5ppm over an operating temp range of -30 to +85 C. The company reports that various frequencies between 8MHz and 40MHz are currently supported, and more are expected to be available in the near future.

TCXO products are available from QVS Tech in a wide variety of configurations, and include low current consumption, extended temperature ranges, and low supply voltage options, in addition to tight stabilities.

Typical applications for the products include GPS devices, PDAs, portable radio equipment, and mobile communication equipment, including cellular and cordless telephones. Those who want to learn more about these products can take a look at the company website.

Scaglione stated, "For your specific frequency and requirement, please contact QVS Tech or your area representative. We are more than happy to help you to determine the best product for your specific needs."

QVS Tech Inc. has been a supplier of high frequency control products for more than 15 years. The company is a small business owned by women, with a reputation for providing superior service and fast delivery of products. They have built relationships with ISO9001 certified offshore manufacturing facilities over the years to provide customers with higher quality products and shorter lead times.

The company offers a wide range of clock oscillators, quartz crystals, TCXO's, OCXO's, VCXO's, and various other products in standard and customized frequencies. All products are RoHS compliant.

Those who are interested in the new TCXO package can reach out to the company. Those who want to contact click here.
