

PSS International Removals Adds Cost Calculator For Clients Shipping To USA From The UK

March 20, 2020

London, England - March 20, 2020 - PRESSADVANTAGE -

UK based PSS International Removals is pleased to announce that a new guide and cost calculator has been added to their website in order to help customers estimate the cost of their next move. Interested parties may access the cost calculator at the following link: [Shipping To USA](#).

Over the course of a lifetime, people tend to accumulate a number of items that have both sentimental and practical value in their lives. As such, should the time come for them to uproot their lives in the UK and move across the Atlantic to the USA, they will naturally want to take as many (if not all) of their belongings with them. Thanks to their extensive history in the industry, the company is aware that these belongings can range wildly in type, size and fragility. Regardless of the challenges presented by items of this nature, however, PSS International Removals is able to transport their clients' personal effects in both a safe and timely manner.

Given that such a move is often an unusual occurrence for the average person, the company also notes that

many of their clients are completely unaware of the issues involved with relocating the contents of a home?and one issue in particular that they worry about is the cost of the move itself. Fortunately, PSS International Removals' new guide and cost calculator aims to address this problem by explaining the many intricacies of shipping overseas as well as providing an easy and intuitive method of estimating the cost of a move based on a few factors. These factors include the general size of the cargo, the type of cargo, the destination and date of the move and so on.

The cost of shipping to the USA can be difficult to calculate on one's own, but the company is always ready and willing to help their clients address any concerns they may have. For instance, the guide they recently published (which can also be accessed through their website) cover a series of questions that clients often ask when contemplating their move. These questions include whether it is best to use sea freight or air freight (as air freight is sometimes the cheaper option), what items can or cannot be shipped (whether due to practical constraints or prohibition/restriction by US Customs), how long shipping can take, whether maritime or shipping insurance is needed and much more. Learn more at the following link: [Cost Of Shipping To USA](#).

Additionally, the company's clients need not fear that they will have to make sense of the entire process on their own. As PSS International Removals explains on their website, "From the moment you register your interest, we assign you with an International Removals Consultant who will choreograph your UK to USA shipping from a pre-home survey, right through to the unloading of your moving boxes and tea cartons. We have been one of the UK's leading providers of personal shipping services for almost four decades. This experience means we know what it takes to move the belongings of families, expats, travellers and students to the USA in one smooth, stress-free process. We serve every American city and state, so we can ensure the safe delivery of your belongings no matter where you're heading in the USA. We ship to all 50 states in America including Florida, California, New Jersey, Texas, Massachusetts, New Hampshire, Illinois, Hawaii and Alaska!"

Given the vast size of the USA, PSS International Removals acknowledges that costs can vary greatly. Should a client wish to obtain a more reliable quote for their move, the company asserts that they need only contact a customer service representative and explain their situation. The International Removals Consultant assigned to each client will be able to give the latter a clear idea of the charges and exclusions that apply to their shipment. However, the estimates provided on the company's website may serve as a rough guide through which they can begin planning their move.

"Moving to the USA can be quite stressful with a lot to think about," says the company. "We hope this guide will allow people to quickly get answers to important questions that they may have. It should also help them avoid potential problems with US Customs by avoiding shipping prohibited and restricted items. PSS International Removals has been helping people ship belongings and move to the USA for nearly 40 years. Our customers include British families moving to America, American expats returning home and British

expats moving to the USA for work.?

Those planning their move overseas to the USA may direct any further enquiries to Liam Witham of PSS International Removals. More information can also be found on their website at <https://www.pssremovals.com>. Furthermore, interested parties may connect with the company through their social media pages to stay abreast of their latest news and announcements.
