

## **Dunlor Announces Their New GPS Tracker Launch**

*August 25, 2015*

August 25, 2015 - PRESSADVANTAGE -

Lindfield's Dunlor has recently announced the launch of its GPS Tracker, the company's newest product. The company first announced the launch through their website at <http://jeevesgpstracker.com/> last month.

The GPS Tracker is a lightweight tracker that utilizes the Assisted Global Positioning System in order to provide accurate tracking results. It is waterproof and extremely portable. It comes with a built-in rechargeable battery. The GPS Tracker can be used on almost all moving objects, including cars, trucks, motorbikes, trailers, boats, and other assets. The usage of the GPS tracker is not limited to objects alone?the product can also be used on children to give parents peace of mind whenever they go to high-risk places, such as malls and amusement parks. "The main goal here is to produce a product that provides security and peace of mind," Marketing Representative Ray said in a recent interview that can be found on <https://www.facebook.com/GPSTrackersnow>. "Our product may be small as a matchbox, but it sure can provide the most accurate tracking results to ensure that our customers' assets are safe and secure. It's a great technological solution to a common problem."

Dunlor's GPS Tracker mainly uses the A-GPS system to monitor movement and to provide accurate tracking results. This works by using satellites in conjunction with mobile networks to optimize the GPS Tracker's locating abilities. In addition, a miniaturized cell phone for communication anywhere there is mobile

coverage is provided to deliver location updates directly to smartphones.

The company also offers simple and affordable connection plans from under \$12 a month. The tracker ensures 100% accurate GPS tracking, done in realtime. It has a two-week battery life and weighs 1.5 ounces. The product can track a moving object's current location with a push of a button. Tracking results show 24/7 realtime tracking. The MyLocate platform provides reports and can be sent to an individual's smartphone. In addition, apps are also available on the iOS and Android networks.

The GPS Tracker is only the start for Dunloor, the company is currently planning on creating new gadgets that combine technology and convenience to meet the growing needs of consumers.
