

Auto Glass Services Go Mobile In Hamilton, Ontario

August 25, 2015

August 25, 2015 - PRESSADVANTAGE -

Mothers Auto Glass, based in Hamilton, ON, is proud to announce that they have expanded their services so that they not only perform repairs, replacements and alterations in store, but also as a mobile service. The company has been offering wind shield repair and replacement services, as well as auto glass alterations for many years. They are the established expert in the field in the Hamilton area.

"We have been offering in house services for many years and our clients have always been very happy with our work," says a representative from Mothers Auto Glass. "However, sometimes it isn't possible for someone to come to us. This may be because of previous commitments or distance, or because it is unsafe to drive a vehicle with the auto glass in a poor condition. Either way, we are now able to come to our clients to offer the same great quality service."

Mothers Auto Glass specializes in auto glass repair and installation, same day services, windshield repair and windshield replacement. They also have a number of professional affiliations that guarantee the quality of their work. Additionally, they provide a full 90 day warranty on their glass and work.

"When it comes to your safety, we believe that there is no room for error," adds the representative. "That's why we offer a 90-day guarantee on our work so you can rest easy knowing that you are completely protected. We get your wind shield installed perfectly the first time, allowing you to move on with your life without worry."

The new mobile service will be available for all the services that the company also provide in house. As can be seen on their website, mothersautoglass.ca, these include stone chip repairs and windshield replacement. These services are available for all types of vehicles, including autos, light trucks, heavy equipment and more.

The business also offers clients a free repair quote. To receive a quote, consumers will have to send them a picture of the damage on the auto glass. This will then be assessed to see whether it can be repaired or whether it needs to be replaced.
