Mobility City Provides Safe Steam Sanitization

March 25, 2020

March 25, 2020 -
Mobility City of Lake County, based in Grayslake, Illinois, realizing the seriousness of the COVID-19 outbreak and how it may be affecting the community, has announced that Mobility City sanitizes mobility equipment safely with steam in the workplace, the home, and other areas. They will strictly follow CDC guidelines to help keep everyone safe and healthy in their work environment. They would like to encourage customers to call them and schedule individual appointments to minimize exposure. And in spite of the outbreak, they would like customers to know that they are functioning without disruptions. They continue with providing rentals, making repairs on mobility equipment, and in scheduling steam sanitizing services for various facilities.

They provide ?Steam 220? steam sanitizing services to help senior communities, assisted living facilities, hospitals, and clinics maintain wheelchair compliance. It is important to note that Steam 2020 does not utilize any chemicals, just a ?dry stream? and evaporates almost immediately. This has been observed to be able to skill a broad range of pathogens. Their steamers are capable of producing up to 295 degrees steam at 110 psi. They have a specialized cost-effective program for servicing large numbers of equipment. They document each piece of equipment by serial number and monitor the date that it was cleaned and if any repairs were done, such as the replacement of brakes or arm pads. This document is helpful when a facility is requested to provide documentation on what they are doing for sanitization and infection control. They can also be provided to any audit.

Mobility City of Lake County provides steam sanitization for various communities and they are expanding their Steam 220 offerings to any individuals, facilities, hospitals, nursing homes, and assisted living facilities, as a way to help stop the spread of bacteria and infectious diseases, including COVID-19. And in view of the decision of some families to keep their seniors at home, rentals are available for hospital beds, wheelchairs, rollators, and lift out recliners. Also, they are currently offering a 10 percent discount for their new Steam 220 sanitizing services until April 30, 2020.

They provide rentals, sales, repairs, and service of mobility equipment to Lake County, Kenosha, McHenry County, and Racine Counties in Wisconsin. Whether people are looking to purchase a new mobility device or have their mobility scooter repaired, they need not look further than Mobility City. The brand has over 30

years of experience in the medical equipment industry and this allows them to provide expert mobility equipment services solutions for wheelchairs, hospital beds, lift chair recliners, power scooters, and more, whatever the brand.

They would also like customers to know that their service can be scheduled within 24 hours and they always strive to complete the job in a single visit with flat rate pricing. With their fully equipped vans and factory-trained technicians they will go to the customers and get them rolling again quickly and efficiently.

They also want people to know that Mobility City of Lake County is dedicated to building relationships and trust with their customers to ensure satisfaction. They work to get to know the customers and their needs and treat them like family. They offer a wide variety of power recliners with lift assist, mobility scooters, wheelchairs, up-walkers, wheelchair ramps, hospital beds and bathroom safety products. They also offer a short-term rental program allowing customers to try products in their home before they buy. Many customers have converted rentals into a purchase or made a different decision based on how they liked the product during the trial phase.

They also want to emphasize that their staff has several years of customer service in the local area, and being local residents themselves, they strive to offer the most service-oriented business possible. They will work with customers using their protocols in order to facilitate any service or repairs. All appointments should be scheduled by phone. When possible, they will perform the work in a secure area or outside the home or business. Once any work is complete, fresh gloves are put on and surfaces are steam sanitized.

Those who are interested in the safe sanitization provided by Mobility City may want to check out their website, or contact them on the telephone, or via email.
