

Stratum Foundation Repair Receives A+ Rating With BBB

August 28, 2015

August 28, 2015 - PRESSADVANTAGE -

Stratum Foundation Repair, a business in McKinney, TX, is proud to announce that they have received A+ accreditation through the Better Business Bureau (BBB). They feel that this properly reflects the care and attention they give to the work they provide, as well as to their customer service. They are ready, therefore, to take on more work on foundation repair in the Dallas Fort Worth metroplex.

"Obtaining an A+ rating from the Better Business Bureau is something we are really proud of," says a spokesperson for Stratum Foundation Repair. "It is a tough accreditation to get and, for us, reflects not just the quality of our work and our customer service, but also the fact that our customers appreciate what we do and place their trust in us. We couldn't thank our customers enough."

In order to achieve the BBB rating, the company had to meet a number of tough criteria. These include having full liability insurance and offering a lifetime warranty on all their foundation repairs. Furthermore, they have had to demonstrate their expertise and high level of customer service. In fact, the company has received zero complaints to date.

The company specializes in steel and concrete pressed pilings. They pride themselves on being able to offer foundation repair solutions that are of the highest possible quality, while remaining affordable. Very few other companies are able to offer this type of work at a low cost.

They have received many positive reviews for their work as well. "I was very satisfied with my experience with Stratum, from the expertise of Eric when he was checking out my foundation to give me a bid, to Whitney when setting up the appointment and follow-up, to the crew, who worked professionally and quickly to fix my foundation," says Lawrie. "I got several bids and Stratum was very competitive and explained the process most thoroughly to me. I would be happy to recommend them to anybody who needs work on their foundation!"

The company encourages all potential customers to check out their website at stratumfoundationrepair.com,

where full details of the work they offer are listed.
