

Lawn And Landscape Company Announces Readiness To Serve The Needs Of Properties During Fall And Winter

August 31, 2015

August 31, 2015 - PRESSADVANTAGE -

Lawn Masters Peel, a business in Mississauga, ON, has announced that it is ready to serve the lawn and landscape needs of property owners during the fall and winter seasons. The company also wants to point out that the fall season is the ideal time to nurture lawns as this will result in a healthier and better lawn come spring time. And during winter, lawn maintenance is needed to minimize damage to the grass.

The company is able to take on any maintenance and landscaping needs of property owners during fall and winter. "Our expertise comes out in our property management and maintenance services," says a representative from Lawn Masters Peel. "We provide the latest lawn care and development strategies to make your home or business look its best. These include long term property care services, and never is this more important than with snow fall, which has the potential to devastate a garden."

The company offers a range of care services, which include fertilization, pruning and weeding, mowing and edging, spring and fall cleanups, waste removal, weekly or bi-weekly service and mulching. Furthermore, they offer turf, plant and seeding services that really revamp the exterior of any property.

Now that summer is almost over, getting a garden winter ready is very important. Once winter hits, however, other services will also be required as snow on the lawn can be detrimental to the grass. "Unfortunately, snow happens," adds the spokesperson. "Our snow removal experts make it unhappen. Contact us today to set up a complete-coverage plan or merely to get a one-time removal during those hard, cold winter days."

Lawn Masters Peel understands that nobody really likes to shovel snow. It is very straining on the body and can actually lead to significant health and safety issues. Additionally, shoveling snow is time consuming and, if not done properly, it could leave a sheet of ice that, in turn, could lead to accidents and injuries.

The company is ready to take on this type of work with a personalized snow removal service. They will make

any driveway clear and safe again, which ensures no accidents will happen either. The service is delivered promptly and efficiently as well. Those who need more information can take a look at the [lawnmasterspeel](http://www.lawnmasterspeel.com) website.
