Unlimited Drilling & Foundations Provides Retaining Wall Repair Services In San Diego

April 01, 2020

April 01, 2020 -

Unlimited Drilling & Foundations, Inc., a general contractor based out of Santee, California, is reaching out to the wider community to share that they provide retaining wall repair services in San Diego and the neighbouring areas. Founded in 1993, Unlimited Drilling & Foundations has completed over 1000 projects. More information about the company can be found at the following link: San Diego Retaining Wall Repair.

A representative for Unlimited Drilling & Foundations says, ?The design of a concrete retaining wall can vary greatly depending on site conditions as well as the engineer designing the wall. Design decisions, such as footing size, block wall or poured in place concrete, the use of caissons and so on can all have an impact on how stable the wall is and how long it will last. If you have any issues with your retaining walls, we?re the people who can help you. In most situations, we can actually repair your wall ourselves, which in turn can save you unnecessary costs. If the wall can?t be repaired, we can replace it.?

The company explains that there are many different options when considering materials for a retaining wall, but not all materials are created equally. According to Unlimited Drilling & Foundations, some of the

most common options that are used are poured concrete, concrete cinder blocks, brick and wood. Each material is used for a unique design aesthetic and also in different situations. The company assures that their clients need not worry about the decision, as Unlimited Drilling & Foundations? team will help them.

Unlimited Drilling & Foundations? representative says, ?The time it takes to build or repair a retaining wall depends on how big the project is. Some projects; for example, simple wall repairs, can be done quickly. However, large estate jobs can and will take quite a bit longer. There are many different variables, such as the materials used and the size of the wall that will dictate how long the repair or build of your retaining wall will take. However, our clients don?t need to worry about anything, because we always do everything in our power to communicate how long the project is estimated to take.?

The representative continues, ?We pride ourselves in doing the job right the first time for a very competitive price. Your project will be done in house. When you hire us, this means we will do the work ourselves instead of hiring a dozen subcontractors. In fact, you?ll see our company?s president on your job constantly, because he doesn?t just get a signed contract and then hand off your project. Every member of the Unlimited Drilling & Foundations team is here to provide the best service for our clients.?

The services provided by Unlimited Drilling & Foundations are of stellar quality, as evidenced by the company?s customer reviews. On the Google platform, the general contractor has a perfect 5-Star rating. In a recent review, Mark Crowley says, ?We had a significant mudslide last winter, and the repair required building an 80 foot wall across the back of our entire property. I have an office at home and was totally impressed by how hard the workers committed themselves to the job each day. They were all professional, thoughtful and especially grateful for any treats we had for them over the 3-week period. Bottom line, they cut no corners, built an exceptional wall and were great to work with?we're very satisfied. They know what they're doing, and I highly recommend their work.?

Meanwhile, Mark Skoog says in their review, ?Our HOA hired Unlimited Drilling & Foundation for a large bank stabilization project that required two retaining walls. We could not be happier with the final product. The scope of the project changed a couple times due to engineering and city requirements, and Joe worked with us to minimize the cost impact. Joe and his crew were very creative in dealing with the limited access to the site and working through the rainy season. I would highly recommend Unlimited Drilling & Foundation.?

Those who want to learn more about Unlimited Drilling & Foundations and the various services they provide can find more information on the company?s website. Additionally, the company encourages interested parties to get in touch with them directly via email or phone. The company can also be reached through the contact form on their website.
