

Birmingham, AL Hearing Specialist Launches Latest in Hearing Technology

March 26, 2020

March 26, 2020 - PRESSADVANTAGE -

Birmingham, Ala. ? A leading innovator and producer of groundbreaking hearing technology is introducing their latest addition in their line of advanced sound-processing technology, Beltone Boost Ultra?. The Birmingham, AL hearing specialist, Beltone USA, believes that the hearing aids advanced streaming capability and range of comfortable designs sets the stage for this technology to become the industry?s most comprehensive hearing solution. The device?s new chip is significantly faster and provides improved sound quality with unique sound clarity and speech understanding.

The Beltone Boost Ultra? is recommended for those living with severe to profound hearing loss. The hearing aid comes equipped with Tinnitus Breaker technology, HPF80 NanoBlock protective coatings and Beltone?s signature Remote Care? which allows their patients to finetune their device from anywhere rather than requiring them to visit the clinic each time they need an adjustment made.

A common issue for many who wear hearing aids is the delicateness of the device?s circuitry. Elements such as dirt, moisture, humidity, earwax and skin oils over time damage the devices' circuitry and reduce the overall effectiveness of the hearing aid. The HPF80 NanoBlock coating is specially designed to protect the

hearing aids from these contaminants.

Additionally, they are compatible with Beltone's Direct Line wireless accessories which allow for sound streaming connectivity directly from most mobile devices including Android and iPhone. This will allow the wearer to stream the wearer's favorite audiobooks, music and television audio directly into the hearing aid in Birmingham.

Beltone USA of Birmingham's professionally trained Hearing Specialists and Patient Care Coordinators are committed to helping each of their patients find just the right solution for their hearing needs. This begins with a free comprehensive hearing test and personalized hearing health assessment aimed at providing the most accurate information and guiding customized treatment decisions for their patients.

For more information about Beltone USA - Birmingham or the Beltone Boost Ultra, schedule an appointment with one of their Hearing Care Coordinators at (205) 824-8170 or visit their website at www.beltoneusa.com/birmingham.
