March 31, 2020 -

Exponential growth is more desirable than linear growth, and this is especially true in business where greater profit strides are the business goals at its core. To achieve exponential growth in business, leveraging is the way to go. Business and success coach, Atif Javid, explains how entrepreneurs can leverage and increase business gains exponentially in his newly published report, "Achieve exponential growth using the power of leverage." He articulately expounds on how the power of leverage has the potential to transform businesses.

The term leverage is defined by the act of using something to gain maximum advantage from it. While it's a common term in business, not everyone understands and applies the very essence of it. Atif Javid carefully explains the whole ball of wax of what leverage means and how entrepreneurs can take it to the task and gain handsomely from it. He brilliantly uses analogies and quotes from phenomenally successful entrepreneurs to explain how leveraging, when done right, can be a game changer for businesses. Atif Javid

also speaks about how he leveraged resources, over the years, to engineer his own business growth.

Atif Javid delves into the five components of leveraging to have a business enjoy exponential growth. He calls them 'the five key levers of success' and they are time leverage, connection leverage, ideas, knowledge, and experience leverage, technology leverage, and systems leverage.

In his report, Atif Javid also talks about his personal experiences and how he is constantly exposed to entrepreneurs who possess great ideas but fall short in implementing those ideas. He shares about how the downturn in implementation can be fixed by slotting the right systems in the right silos that will bring about consistent quality, a scalable business, reduced costs, increased profitability and other factors that bring about exponential business growth.

Atif Javid wraps up the blog by saying that there is no bigger leverage than business owners themselves. He states that mindset development and nurturing, learning how to execute business goals by appropriate action, and most importantly, maintaining and constantly improving physical and mental health play key roles in self-leveraging that will bring in exponential entrepreneurial accrue.

As a veritable precursor to 'Achieve exponential growth using the power of leverage,' Atif Javid has written about how prioritizing health is critical and important if an entrepreneur wants to be successful.
