

Lake Elsinore Dentist Brings New Talent to Their Highly Skilled Staff

March 30, 2020

March 30, 2020 -

Lake Elsinore, California, dentistry announces two very bright and talented stars have joined their already skilled dental team. This upscale, private practice located in the Inland Empire of Riverside County has been serving So Cal for almost 30 years with the acclaimed cosmetic and general dentist, Dr. Derek B. Hauser, DDS. Current patients of Lakefront Family Dentistry know the staff treats each person like a member of their extended dental family.

The new Registered Dental Hygienist, Martina, brings 14 years of education, training and experience to the team. She began her educational training in 2006 within the dental field. It was a lifelong dream and passion of hers as a child to be part of an industry that makes a difference helping others with their health. During her final year in dental hygiene school, Martina received the Director's Award for outstanding efforts and clinical achievements. She is also involved with two non-profit charities called Give Kids a Smile and California Care Force.

Not only does this upscale dentist office have four Registered Dental Hygienists?they now have four Patient Coordinators, with the introduction of Jennifer. Since this office is in such high demand throughout Southern

California, they hired Jennifer who has extensive general dentistry, endodontics, oral surgery, periodontics and orthodontic experience. In addition, she has experience in coordinating TMJ, sleep apnea and full mouth restoration cases.

Dental hygiene is at the forefront of this practice, because it provides Dr. Hauser with the foundation and diagnostic images from their own SIRONA Orthophos XG 3D CT Imaging System to see what lies underneath the gumline. Seventy percent of one's teeth are below this area, where cavities, alignment issues and additional oral health problems can occur without a patient's knowledge.

Lakefront Family Dentistry's four amazing Registered Dental Hygienists are busy during the week to keep patient's oral hygiene at their best with professional teeth cleaning, while increasing their overall health. They enjoy educating each patient on the proper cleaning, flossing and brushing techniques, so they can reduce the amount of tartar and plaque buildup that can often cause periodontal disease, gingivitis and gum disease.

Healthy patients come back every six months to keep abreast of their oral health, and the reviews of these four Registered Dental Hygienists on every social media platform ring with 5-stars.

As a native So Cal resident, I have always wanted to serve the community that has given so much back to me, including attending and graduating from the University of Southern California School of Dentistry in 1993. It is important for our practice to have an experienced, positive team who makes patients feel safe and comfortable coming to the dentist. That is also another reason we have our amazing dental therapy dog, Stella, who reduces the anxiety some people previously had until we introduced her to patients. Our Conscious Oral Sedation Dentistry helps you relax, and the new Solea Laser means no more numbing or pain for fillings and gum treatment," says Dr. Hauser.

Lakefront Family Dentistry also specializes in cosmetic dentistry, where Dr. Hauser makes the best veneer teeth and crowns using their own in-house CEREC milling machines.
