South Riding Oral And Implant Surgery Offers Dental Implants In Chantilly, VA

April 21, 2020

April 21, 2020 - PRESSADVANTAGE -

Virginia based South Riding Oral and Implant Surgery is reaching out to the wider community to announce that they offer dental implants in Chantilly and the surrounding areas. Dr. Kamran Raja, a Board Certified Oral & Maxillofacial Surgeon, and his team at the clinic are experts at Wisdom Teeth Removal, TMJ Surgery, Corrective Jaw Surgery, Dental Implants and Bone Grafting. More information about the clinic and their services can be found at the following link: [Dental Implants Chantilly VA](#).

Dr. Raja says, "There is no doubt that your teeth are an integral and important part of your day-to-day routine. A missing or broken tooth can have a severe impact on your speech, eating choices and bite. Further, it will also increase your dependence on the remaining teeth and increase their chances of prematurely wearing out or being damaged themselves. The way to fight this issue is by getting dental implants, and that's where we can help. At South Riding Oral and Implant Surgery, we provide state-of-the-art dental implant surgery that will fix any oral issues you have and improve the quality of your life immensely."

The clinic explains that the dental implant process requires oral surgery and is usually performed while the

patient is sedated. During surgery, the dentist will drill a small hole in the jawbone and carefully screw the base into the bone. The gum is then placed over the implant so that it can heal. The clinic also states that getting a dental implant ensures long-term dental health as several studies have shown that dental implants can last up to 20 years, and crowns can often last between 10 and 15 years before requiring replacement.

With a state-of-the-art maxillofacial facility and the help of cutting edge surgical technologies, South Riding Oral and Implant Surgery is among the best dental clinics in Virginia. The clinic employs extremely kind, gentle and caring staff who place special emphasis on paying attention to their patients' needs and delivering dental solutions that meet each of their personalized requirements.

The excellent services provided by South Riding Oral and Implant Surgery have earned them a lot of praise from their patients. On the Google platform, the Chantilly Oral & Implant Surgery Center has a perfect rating of 5 out of 5 Stars. In a recent review, Todd Sundra says, "Dr. Raja and staff were unbelievable. I immediately felt comfortable talking with them about my procedure, and they were constantly monitoring my condition. Throughout my procedure, they were gentle and attentive to my needs. Even after my procedure, they called to see how I was feeling and if I needed anything else. I would highly recommend this practice."

Meanwhile, another patient says, "I came across this gem of a place, and I am so glad I found this facility! I have always been skeptical about going to get teeth work done, but I tell you South Riding Oral & Implant facility is the best! They make you feel so comfortable, and they are straightforward and honest. The staff were super friendly, and the details they give you are amazing. Dr. Raja is wonderful. He is charming and super sweet. He definitely knows what he is doing and goes an extra mile to make you feel comfortable! He is doing a fantastic job. My experience of getting implants with them was super comfortable and I loved it. I am definitely going back to them and recommending them to everyone I know. We need more places like this in Virginia! 10 Stars for a 10-Star place and service!"
