

Dunloor Announces Product That Makes It Easier To Track Your Pet

August 25, 2015

August 25, 2015 - PRESSADVANTAGE -

Lindfield, New South Wales company, Dunloor, has announced the launch of a new product designed to make it easier to track pets. The GPS tracker features an app that easily downloads to Apple or Android phones, making tracking simple and fast.

"Do your pets escape often and leave you worried when you can't find them? We've made it easy to track them down now," says Emily Baxter of Dunloor. "We've designed the perfect product for helping pet owners to keep track of their pets, and find them easily if and when they wander from home."

Owners of pets that have the tracker will receive an alert when their pets escape their Geo Fences. They can also change the frequency of updates when searching for pets that have escaped.

The tracker is a small, lightweight, and accurate unit that fits perfectly on pets' collars. It is waterproof and rugged to withstand rough treatments from pets, and works with pets of all types and sizes.

Subscriptions are offered by the company, with website at <http://jeevesgpsracker.com/>, and all plans come

with 24/7 tracking as well as a reporting feature that allows pet owners to choose a unique chase mode when continuous reporting is needed.

"It's wonderful," says Melanie, a farmer in New South Wales. "We worry so much about our dogs getting through the fence, and you just don't know what will happen to them if they stray away from home. With this, we know that we can instantly track them down and bring them safely back home."

The pet tracker offers a long battery life due to the lithium battery that is built in. Many pet owners report up to two weeks of standard use before they would need to recharge. And the battery is rechargeable so there are no worries of having to constantly purchase batteries.

The tracker utilizes the assisted global positioning system to optimize its tracking abilities, delivering location updates directly to user smartphones. Those who would like to learn more about the tracker can visit Dunloor at their official website or on their Facebook page at <https://www.facebook.com/GPSTrackersnow>.
