

Mr. Chem-Dry Offers Salt Lake City Tile Cleaning Service That Can Help Sanitize the Home

April 21, 2020

April 21, 2020 - PRESSADVANTAGE -

Mr. Chem-Dry, a professional cleaning services provider that offers tile cleaning services in Salt Lake City, Utah, has revealed that the cleaning they provide can sanitize tile and stone surfaces in the home and kill the coronavirus. Independent laboratory testing has assured the healthfulness and efficacy of their tile, grout, and stone cleaning process. It was found that the cleaning process, in combination with a sanitizer, was able to eliminate an average of 99.9 percent of the microbes from those surfaces. More about this can be gleaned from <https://www.mrchemdry.com/utah-tile-cleaning.html>.

Daryl Olsen, president of Mr. Chem-Dry, says, "Contrary to popular opinion, the environment inside your home can be two to 100 times more polluted than the air outside. Homes are supposed to be a safe haven that protect us from exposure to unhealthy elements like allergens, germs, and pollutants. However, a build-up of bacteria, dust, pet dander, and possibly the coronavirus, on flooring surfaces can endanger the health of family members. One worry that many homeowners have when having their homes cleaned is whether the products and process that the cleaner uses is even healthier than what they are removing. That is not a worry with Chem-Dry. All of the ingredients in our primary cleaner are safe and approved for your home and family, so you can know that your family is being well taken care of."

The tile, stone, and grout cleaning and services offered by Mr. Chem-Dry use cleansing agents that are able to penetrate deep inside the porous surfaces to get rid of bacteria and other microorganisms, remove grime, and seal out dust and dirt. This will restore the previous brand new appearance of the floors, while also prolonging the life of the stone and tile surfaces. The cleaning technicians from Mr. Chem-Dry utilize specialized cleaning solutions, including deep cleaning extraction equipment to get rid of accumulated dirt, making the home cleaner and healthier for all family members. More information about this can be obtained from <https://chem-dry.net/mrut/services/utah-stone-tile-grout-cleaning> .

With the tile cleaning service provided by Mr. Chem-Dry, the floors and other tile surfaces in the home will regain their healthy shine and will recover their initial look when they were first installed. However, the grout is a highly porous material that can absorb soil, dirt, and other contaminants, which makes them much harder to clean. After cleaning, the tile and stone floors, the cleaning technicians will apply a sealant, which will prevent dirt and germs from getting in. This allows easy clean up of any spills before they can soak into the grout, making them very difficult to remove.

The certified and trained Mr. Chem-Dry professional tile cleaners will take the time to thoroughly clean the tile, stone, and grout, offering the best possible service, and ensuring a healthier and safer home for the family. They will take a number of steps during the cleaning process.

First, they will conduct some pretests to identify the type of stone or tile to ensure that these are cleaned safely, especially when cleaning acid-sensitive surfaces, such as marble, travertine, terrazzo, and limestone. Second, they will conduct additional inspection, protect adjacent surfaces, and clear away surface dirt, dust, and soil for more effective deep cleaning results. Third, they will conduct regular quality checks while the cleaning process is ongoing, making sure that the results are not uneven or below par. Fourth, they will apply sealers immediately after cleaning. And finally, they will perform additional floor cleaning services, such as stone polishing, grout recoloring, and granite renewal to bring back the original color and luster of the floor and other surfaces. Their floor cleaning services are for various types of flooring, such as granite, ceramic, slate, porcelain, travertine, saltillo, and concrete.

They also offer other cleaning services, such as carpet cleaning, furniture cleaning, pet urine and odor removal, specialty stain removal, leather cleaning, commercial services, and water damage restoration.

Those who are interested in tile cleaning services may want to check out the Mr. Chem-Dry website at <https://www.mrchemdry.com/>, or contact them through the telephone or via email.
