

Dryer Vent Cleaning Services Available In Sandy, Utah

April 09, 2020

April 09, 2020 - PRESSADVANTAGE -

Centerville, Utah based All Clean Air Duct Cleaning is pleased to let their clients know that they will continue to offer their services over the coming months. The company foresees little in the way of disruption of service due to social distancing policies set in place in response to the COVID-19 pandemic and will adopt all precautions encouraged by health authorities in order to ensure the safety of their technicians as well as their clients. Learn more about the company and their services at the following link: <https://www.allcleanairductcleaning.com/>.

All Clean Air Duct Cleaning has a reputation for maintaining a high standard of service, and their extensive experience in the field has given them an appreciation for how important it is to keep a dryer vent clean. As the company notes, the US Consumer Product Safety Commission (USCPC) identifies dryers as the leading cause of household fires in the nation. This makes a comprehensive and reliable dryer vent cleaning service all but irreplaceable, even in present circumstances. While Centerville residents have long benefitted from the company's close proximity to their homes, All Clean Air Duct Cleaning is keen to reassure Sandy homeowners that their services are never more than a phone call away.

Daryl Olsen of All Clean Air Duct Cleaning states, "Many families are keeping a close eye on the progress of the pandemic and staying home as much as possible in order to minimize both their own risk of infection as

well as the overall spread of the virus. Since this means their houses are likely occupied at all hours of the day, it makes sense for them to see that their home environment is as safe as possible. After all, we must remember that the serious nature of the ongoing pandemic does not necessarily make us less prone to other sources of trouble. We can still get sick due to more mundane illnesses, and our appliances can still malfunction and wreak havoc. Explore the subject further at the following link: <https://www.allcleanairductcleaning.com/service-areas/air-duct-cleaning-sandy-utah/>.

Given how important it is for a dryer vent to be cleaned appropriately, Olsen cautions homeowners against attempting to service their machine on their own. On that note, he also points out that cleaning out the lint after each use of the dryer is not enough to ensure that it runs as efficiently (and is as clean) as possible. This is due to the fact that lint can accumulate over time in hard-to-reach crevices and areas of the system that are difficult for a regular person to reach, especially without the right tools. All Clean Air Duct Cleaning's team of technicians, fortunately, are able to thoroughly inspect and clean out all the lint in a system thanks to their experience in the field as well as their access to specialized cleaning equipment.

As the company states on their website, "Getting professional assistance for dryer vent cleaning will boost efficiency and help you reduce the risk of serious accidents. Companies like All Clean Air Duct Cleaning offer high quality, professional duct cleaning services. Instead of attempting to handle the task on your own, you should definitely opt for a professional guarantee of quality execution."

The company's customers attest to the quality of their services as well. In a 5-Star Google review, Kristi Sue Kearl reports that, "My dryer was taking 1 & 1/2 hours to dry a load. We tried cleaning the vent tunnel with a Home Depot kit on our own and didn't see any improvement. In the process, we discovered that the dryer vented to the roof and came out right under a solar panel, which limited our access to the vent opening. I explained this to Justin, who is a problem-solver and an out-of-the-box thinker. He came out with a partner. After they checked the dryer vent tunnel and found it was clean, Justin climbed into my attic and accessed the opening from under the roof. He came back down with a grate that had been at the exit of our vent; it was completely clogged with lint. Now we can dry a load in 30 minutes. I am absolutely thrilled!"

Homeowners who are concerned with the state of their dryer may reach out to Daryl Olsen to follow up on any inquiries regarding its maintenance. More information can be found at the following link as well: <https://www.allcleanairductcleaning.com/our-services/dryer-vent-cleaning/>.
