

## **All Clean Air Duct Cleaning Discusses the Many Benefits of Air Duct Cleaning in Layton Utah Homes**

*April 21, 2020*

April 21, 2020 - PRESSADVANTAGE -

Centerville, Utah-based All Clean Air Duct Cleaning has taken the time to point out the many benefits of home air duct cleaning. They say that changing an HVAC system air filters and getting the ducts cleaned periodically can significantly improve the air that a family breathes in their home. This is especially true if they have long-haired pets or live in a fairly dusty area.

Daryl Olsen, the company owner, had this to say about the importance of air duct cleaning, "Many people do not realize it but indoor air is thought to be five times more polluted than outside air. If that does not scare you it should because most people spend at least half a day in their homes. It's also a fact that most of your indoor air will also travel through your central heating and air system ducts at one point or another. That can happen as many as 5 or 6 times during a 24-hour period. This is why it's so important to keep air ducts from building up with dust, allergens, pet dander, and other undesirables in the home you breathe. A single air duct cleaning session from us can remove several pounds of dust and other contaminants. It really is important for anyone that has a home HVAC system to get their air ducts periodically cleaned."

Olsen went on to talk about the many benefits of periodic air duct cleaning. He said first and foremost it will

greatly benefit those with asthma, allergies and other upper respiratory ailments because it will reduce the number of irritants that they breathe. It's also one of the better ways to get rid of bothersome dust mites in a home. The company owner says that duct cleaning can inhibit the ability of mold to grow on the walls of air ducts because mold has a harder time staying attached to the interior surface of the air ducts when they are contaminant free.

The company owner mentioned that periodic duct cleaning has other benefits besides improved air quality too. He says it can also help an HVAC system run more efficiently. When dust and debris build-up in vents, grilles, and the walls of air ducts it can cause critical airflow to the HVAC system to slow down and, in turn, that system has to run longer to make up for that lower heating or cooling efficiency. Dust and other debris can also cause efficiency loss by accumulating on heater burner components and air conditioning unit condensers and coils. Olsen pointed out that a more efficient HVAC can also save you some money on your home heating and cooling bills. He also says that clean and efficient HVAC systems and their associated ductwork will also have the potential to make that home comfort system last longer. For more information on the benefits of air duct cleaning, interested persons can refer to this page on the company website: <https://www.allcleanairductcleaning.com/service-areas/air-duct-cleaning-layton-utah/>.

Olsen also went on to say that their air duct cleaning crew is one of the most experienced in the area. He says that although it's nearly impossible to reach every nook and cranny on extensive ductwork, his cleaning crew does a great job reaching the majority of it. They also use sophisticated equipment such as negative air duct cleaning machines which is the much-preferred method for proper air duct cleaning these days.

All Clean Air Duct Cleaning's owner also wanted people to be aware of air duct cleaning companies that are not as advertised. He says that there are ways that these companies can be spotted. These include saying they can clean air ducts in as little as 2-hours and if they claim to use a rotary brush tool to clean the inside walls of air ducts. Olsen says that companies that quote \$100 or less for air duct cleaning will probably end up switching that to a more expensive price once they start the job too.

More on the company's air duct cleaning services and the other cleaning services that they offer can be seen on their website at <https://www.allcleanairductcleaning.com/>.
