

The Free COVID-19 Social Media Pack for Medical Practices

April 13, 2020

April 13, 2020 -

The Clinic Marketing Group (https://clinicmarketinggroup.com) is announcing the release of an innovative free digital marketing service, the COVID-19 Social Media Pack for medical practices. The service is being made available to licensed independent medical practitioners and private healthcare practices operating in the U.S. free of charge.

The Social Media Positivity Pack features two web pages and an ongoing stream of useful and encouraging news and information about winning the fight against COVID-19. New content will be broadcast daily on subscriber?s social media accounts and linked to pages on their website. The content includes a COVID-19 Myths & FAQs page, an ongoing compilation of answers to common questions that will combat the misinformation and myths that are circulating about the virus. Subscribers will also receive free Social Media content featuring positive and practical blog posts, news articles, and scientific and medical updates, all distributed widely on their social media channels. Medical practices or healthcare clinics that lack social media accounts can also receive assistance.

Clinic Marketing Group CEO Tim McGarvey says the firm is offering this free package as a way of giving back to the medical community. ?We want to help medical practices establish a strong reputation online and build their social media presence,? says McGarvey, ?Hopefully, we can win them some new patients in the process.? According to McGarvey, medical doctors deserve to return to thriving, healthy medical practices once this pandemic has been conquered.

CMG is collecting, curating, and distributing a daily stream of news articles, research studies, blogs and social media posts, from medical professionals, scientific experts and respected health organizations, such as WHO, the CDC, and other well-known medical institutions. The packaged content runs on the most impactful social media platforms, such as Facebook, Twitter, LinkedIn, and Instagram.

Clinic Marketing Group is a digital marketing agency that supports private medical practices with strategic strategies that bring new patients into medical practices and assists them with business consulting and management. Their expertise in serving medical practices put them in a unique position of being able to support doctors during this time.

Licensed medical or healthcare practitioners can request the free COVID-19 Social Media Relief here: https://clinicmarketinggroup.com/covid-19-free-social-media-pack/.
