

Chicago Illinois Company Offers Emergency Crane Services

April 20, 2020

April 20, 2020 - PRESSADVANTAGE -

Imperial Crane Services (ICS), a Chicago, Illinois based crane service, would like to announce the availability of their emergency crane services. Whether one needs help with a major construction project, hauling heavy goods and so on, ICS is able to provide one of their cranes for the job. Hiring a crane can make any of a number of jobs a lot easier, and ICS strives to ensure that their clients' projects are completed as quickly and efficiently as possible.

When hiring a crane, it is important to ensure that one selects the right model for the job. When on-site, decisions have to be made quickly and effectively to minimize delays in the job tasks and ensure that no resources are wasted, the crane service says. Selecting the wrong type of crane or hauling equipment can prove devastating for the business from a safety perspective, unnecessary costs to a significant backlog of work. Looking for the right types of cranes including affordable rentals helps address project requirements with efficiency and professional standards. Imperial Crane is involved from start to finish to assure each customer that the best crane option was selected based on the job at hand and factoring in every aspect of safety.

Chicago crane rentals are generally much more affordable than purchasing a crane. Instead of having to purchase multiple cranes for different applications, one can simply rent the equipment for the duration they need it for far less than they would have to purchase it for. Imperial Crane Services has a large collection of cranes available for hire for many different applications.

The first and most important step when hiring a crane company is to have a complete project plan before taking on the job. Construction professionals can provide advice on any project and help project managers select the right equipment for the job. At Imperial Crane Services, one can find a number of professionals who are both able and willing to assist with the selection of a crane. The company provides clients with the information they need to make the right choice regarding which cranes to hire for their projects, deciding how to get the cranes to the location where they are needed as well as any other logistical challenges that they might need assistance with.

“Renting cranes is no small feat, and requires the proper planning for its transport and operation in public and residential areas,” the crane rental service says. “If you need to access a road that includes constant traffic, receiving the necessary approvals and permits will help protect the machinery from unauthorized access, but also protects the public from unnecessary delays and hazards. Traffic authorities and OSHA who inspect these sites will request documentation or proof that you are authorized to use such equipment in a specific zone.”

Many of ICS’ clients have left excellent reviews on a number of platforms regarding the company’s work. Keith Splitgerber, Senior Project Manager at Omega Demolition, says, “Thank you for your continued efforts to provide Omega with excellent equipment, quality operators, and superior customer support to continually fulfill Omega’s project needs. Imperial is a highly regarded and valued resource for Omega Demolition. Additionally, Omega would like to thank Imperial for providing additional training and support during Omega’s Safety Meeting this past week. Omega’s on-going pursuit of the highest levels of safety on all of its projects is obviously echoed by Imperial.”

Similarly, Mike Leamanczyk from National Builders Insurance C., states, “Imperial Crane Service’s commitment to risk management excellence is truly an amazing accomplishment. We have underwritten literally thousands of crane accounts since 1996 and rarely do we see this type of favorable loss experience, particularly with the scope of Imperial projects that include refineries as well as tough City of Chicago projects.”

For more information on Imperial Crane Services and crane rental in Michigan, visit the company's website. ICS is more than willing to help one select the right crane for every job, and clients are guaranteed to find all

the equipment they need at Imperial Crane Services. Interested parties may contact Gina Kaktis of Imperial Crane Service for further details as well.
