

Towson Roofing Contractor Celebrates Fourteen Years of Providing Roofing Services

May 14, 2020

May 14, 2020 - PRESSADVANTAGE -

Towson, MD - Towson Roofing Pros is pleased to announce that the Maryland roofing company has reached a milestone of more than fourteen years in operation, providing roofing products and services to residential and commercial clients in the Towson area. Towson Roofing Pros has a proven track record throughout the Baltimore metropolitan area. Towson Roofing Pros is one of the most reputable residential and commercial roofing contractors in the region. They specialize in innovative roofing systems and superior roofing services.

According to Julius Mills, speaking to an interviewer, "Our commitment to high-quality roofing materials makes us your trusted choice for commercial roofing services, commercial roof repair, commercial roof restoration and commercial roof replacement. We are experts in handling asphalt roofing, metal roof coatings and foam roof installations. With roofing contractors that go above-and-beyond in service and dependability, you can trust Towson Roofing Pros to fulfill all your commercial roofing needs. Towson Roofing Pros provides commercial roof leak repair; metal roof coatings and restoration; single ply options; EPDM rubber roof repairs and restoration; and flat roof and low slope roof options."

“We are experts in all types of roofing systems,” he continued. “We are a roof repair and restoration company that specializes in pitched and flat roofs. We use the highest quality roofing materials and our roof warranty is second-to-none in the Towson area.”

The company explains that their mission is “connecting home improvement contractors with homeowners, making them easily available and accessible on a single platform.” They aim to take the hassle and guesswork out of finding a home improvement contractor by bringing together the best of local services in one place that they can trust.

The energy efficient roofing provided by Towson Roofing Pros helps customers to gain cooling cost savings which can come from changing the color of the roof. A light colored roof can keep the business or residence much cooler in the summer. On a hot summer day, the surface of this light colored roof is more than thirty degrees cooler than the darker roof. Color choice can translate into significant savings in utility costs. Those looking to learn more can visit the website at <https://towsonroofingpros.business.site/posts/3439144927936725204?hl=en>.

When asked about the roof repair and replacement and gutter cleaning and installation services, Julius Mills said: “We think it’s going to be a real hit because giving home and business owners a local company committed to the community are not just storm chasers.”

The local, small business is dedicated to ensuring the highest quality and this means that they guarantee that every roofing expert that they send to the jobsite is a genuine specialist within their trade. They can also offer their services to both residential and commercial property owners.

“We are so excited to finally be fourteen years in the roofing industry,” said Julius Mills of Towson Roofing Pros. “We know that commercial building owners and property managers don’t tend to be roofing experts. Often, confusion about how roofing systems really work leads to them paying a lot more for roof replacement when they could have simply had the roof repaired or restored. This is the main reason we’ve decided to launch our new website. We wanted property owners to be able to get a better sense of what we do while learning more about how roof restoration actually works, how it can solve their roofing problems, and how it helps them keep more money in their pockets.”

In addition to learning more about Towson Roofing Pros and the services they offer, visitors to the roofing contractor’s new website will be able to see before and after pictures of recent commercial roof restorations the company has done. If they like what they see, property owners and managers can use the short form to the right of each page to request their own commercial roofing inspection and estimate at no charge.
