

# Anne Arundel County Roofing Company Celebrates Another Commercial Roofing Contract

*April 23, 2020*

April 23, 2020 -

Glen Burnie, MD - Roofs provide protection from natural elements such as rain, sun, and snow. In Maryland, hailstorms are quite frequent. Choosing the right roof is crucial in ensuring the safety of each member of the family. Using the wrong roof can put family members at risk. Aside from that, homeowners can incur huge property losses. Marriott & Sons Roofing would like to celebrate another commercial project in Anne Arundel County.

One of the earliest challenges Marriott & Sons Roofing faced was understanding that any roofing project is a huge investment from the client?s part. For this reason, they guarantee the best available services possible in the clients? budget. While every business of course faces challenges, some, like Marriott & Sons Roofing are fortunate enough to enjoy real successes, wins and victories too.

Zachary Mathis, owner at Marriott & Sons Roofing was also quoted when discussing another big win, ?One of the high points of Marriott & Sons Roofing?s history so far is that we pride in the fact that all our

clients have been thoroughly satisfied with all the services we have so far offered.?

Marriott & Sons Roofing?s Mathis says, ?We?re delighted to be celebrating our 30 Year Anniversary. I believe the secret to getting this far in business today is we?re using the latest technologies and roofing techniques to fix your roof and are always available 24/7 for services?.

Marriott & Sons Roofing currently consists of 30 employees and has big plans for the upcoming year. One of their core objectives is to be the leading trustworthy roofing contractor that always uses all the resources that we have to deliver quality services and put utmost attention to detail while working on residential roofing and providing proper clean-up in all of our works.

Replacing or installing a roof is something that is best left to the professionals. It can be tempting to make roof replacement or installation a DIY project. However, for the safety and protection of family members, it is recommended to let an expert roofing company like New Line Roofing do the job.

One of the most popular green roofs is metal roofing. Roofs made out of metal roofing material can save up to 40 percent in energy. They are also considered ?cool? roofs, so they are recommended for people living in hot areas. It is also a known scientific fact that dark colors absorb more solar radiation than light ones. Thus, switching to a light-colored or a white metal roof will reduce energy spending by 20 percent, in addition to help make properties 50 to 60 degrees cooler, compared with properties with conventional dark-colored roofs.

Roofing experts from Marriott & Sons Roofing will gladly visit and inspect homes or commercial buildings without obligation to the property owner. They will recommend whether a new roof needs to be installed or the old roof just needs to be replaced. Interested homeowners can learn more about their asphalt roofing service at https://www.pressadvantage.com/story/34336-local-roofing-company-offers-asphalt-roofing-service-to-anne-arundel-county-residents.

If there is hail damage, Marriott & Sons Roofing will assist homeowners through the claims process. Each project is treated with respect and work will not stop until the homeowner is satisfied. The company has its own crew who have been factory-trained and understand OSHA safety protocols.

Marriott & Sons Roofing is a locally owned and operated Maryland business. Whether its flat roofing or other roofing services, homeowners, building owners, and property managers trust Marriott & Sons Roofing. With their experience in situational knowledge and industry expertise, homeowners can expect the highest level of integrity for their project.

Marriott & Sons Roofing has more than 50 years of combined experience in the roofing and waterproofing products and technologies sector. They are experts in the restoration market and work with insurance carriers and can assist with property claims.
